

Age/Gex distribution	A model used in population geography that describes the age and number of males and females within a given population, also called population pyramid
Baby boom	A cohort of individuals born in the US between 1946 and 1964, which came just after WWII in a time of relative peace and prosperity. These conditions allowed for better education and job opportunities, discouraging high rates of birth, marriage and fertility.
Carrying capacity	The largest number of people that the environment of a particular area can sustainably support.
Census tract	Small, country subdivisions, usually containing between 1000 and 5000 persons, distinguished by the US Census Bureau as areas of relatively uniform population characteristics, economic status, and living conditions.
Chain migration	The migration event in which individuals follow the migratory path of preceding friends or family members to an existing community.
Child mortality rate	Number of deaths per thousand children within the first 5 years of life.
Cohort	A population group unified by a specific common characteristic, such as age, and subsequently treated as a statistical unit.
Cotton Belt	The term by which the American South used to be known, as cotton historically dominated the agricultural economy of the region. The name used to now known as the New South or Sun Belt because people have migrated there from older cities in the industrial North for a better climate and new job opportunities.
Crude birth rate	The number of live births per year per 1000 people.
Crude death rate	The number of deaths per year per 1000 people.
Demographic accounting equation	An equation that summarizes the amount of growth or decline in a population within a country during a particular time period taking into account both natural increase and net migration.
Demographic transition model	A sequence of demographic changes to which a country moves from high birth and death rates to low birth and death rates through time.
Demography	The study of human populations, their temporal and spatial dynamics.
Dependency ratio	The ratio of the number of people who are either too old or too young to provide for themselves to the number of people who must support them through their own labor. This is usually expressed in the form $x/100$, where x equals the number of dependents.
Doubling time	Time period required for a population experiencing exponential growth to double in size completely.
Emigration	The process of moving out of a particular country, usually the individual person's country of origin.
