*Ethics and Technology* Herman T. Tavani, 2016-01-11 *Ethics and Technology* 5th Edition by Herman Tavani introduces students to issues and controversies that comprise the relatively new field of cyberethics. This text examines a wide range of cyberethics issues from specific issues of moral responsibility that directly affect computer and information technology IT professionals to broader social and ethical concerns that affect each of us in our day to day lives. The 5th edition shows how modern day controversies created by emerging technologies can be analyzed from the perspective of standard ethical concepts and theories.

*Communication and Technology* Lorenzo Cantoni, James A. Danowski, 2015-08-31 The primary goal of the *Communication and Technology* volume 5th within the series *Handbooks of Communication Science* is to provide the reader with a comprehensive compilation of key scholarly literature identifying theoretical issues, emerging concepts, current research, specialized methods, and directions for future investigations. The internet and web have become the backbone of many new communication technologies, often transforming older communication media through digitization to make them compatible with the net. Accordingly, this volume focuses on internet web technologies. The essays cover various infrastructure technologies ranging from different kinds of hard wired elements to a range of wireless technologies such as WiFi, mobile telephony, and satellite technologies. Audio visual communication is discussed with reference to large format motion pictures, medium sized television and video formats, and the small screen mobile smartphone. There is also coverage of audio only media such as radio music and voice telephony, text media in such venues as online newspapers, blogs, discussion forums, and mobile texting, and multi media technologies such as games and virtual reality.

*Critical Theory and Social Media* Thomas Allmer, 2015-04-10 Social media platforms such as Facebook, YouTube, and Twitter are enormously popular; they are continuously ranked among the most frequently accessed websites worldwide. However, there are as yet few studies which combine critical theoretical and empirical research in the context of digital and social media. The aim of this book is to study the constraints and emancipatory potentials of new media and to assess to what extent digital and social media can contribute to strengthen the idea of the communication and network commons and a commons based information society. Based on a critical theory and political economy approach, this book explores the foundational concepts of a critical theory of media technology and society, users' knowledge, attitudes, and practices towards the antagonistic character and the potentials and risks of social media, whether technological and/or social changes are required in order to bring about real social media and human liberation. *Critical Theory and Social Media* examines both academic discourse on and users' responses to new media, making it a valuable tool for international scholars and students of sociology, media and communication studies, social theory, new media, and information society studies. Its clear and interesting insights into corporate practices of the global new media sector will mean that it appeals to critical social media users around the world.

*A History of Participation in Museums and Archives* Per Hetland, Palmyre Pierroux, Line Esborg, 2020-03-17 *Traversing disciplines: A History of*

Participation in Museums and Archives provides a framework for understanding how participatory modes in natural cultural and scientific heritage institutions intersect with practices in citizen science and citizen humanities Drawing on perspectives in cultural history science and technology studies and media and communication theory the book explores how museums and archives make science and cultural heritage relevant to people s everyday lives while soliciting their assistance and participation in research and citizen projects More specifically the book critically examines how different forms of engagement are constructed how concepts of democratization are framed and enacted and how epistemic practices in science and the humanities are transformed through socio technological infrastructures Tracking these central themes across disciplines and research from Europe Canada Australia and the United States the book simultaneously considers their relevance for museum and heritage studies A History of Participation in Museums and Archives should be essential reading for a broad academic audience including scholars and students in museum and heritage studies digital humanities and the public communication of science and technology It should also be of great interest to museum professionals working to foster public engagement through collaboration with networks and local community groups

Policing Ethically Clive Harfield, Allyson Macvean, 2025-06-27 At a time when much in UK policing is the subject of intense public and media scrutiny there prevails a practitioner discourse about policing ethically that is ongoing formally in police ethics committee discussions and probably informally in station offices canteens classrooms and police vehicles Since January 2024 these conversations have added emphasis with the publication of the College of Policing s revised Code of Ethics with which policing practitioners in England and Wales are coming to grips This book explores thinking about policing ethically for those who have to use and implement the ideas to those who when law and policy is silent on the matter before them nevertheless have to make a justifiable decision and act upon it Applicable to policing generally not just to the UK Part 1 of this book

presents conceptual contextualization for thinking about policing ethically Following which Part 2 considers practical implications of policing ethically Some of the key topics that the book covers are as follows Discussions of managing power and vulnerability Implementing frontline ethics in practice The process of making ethically informed decisions Considerations around ethics and the use of artificial intelligence by policing practitioners Prerequisites to ethical leadership Considering public interest in relation to policing ethically Risk management as a moral obligation Drawing upon the policing practitioner and policymaking experience of the authors this book will be of interest and use to all those involved in delivering policing constables of all ranks student probationary and experienced policing community support officers professional support staff policing ethics committee members and policymakers The book is also a contribution to the wider academic literature on policing and ethics and will be of interest not only to policing ethicists and ethnographers but also to students and policymakers in the fields of criminology sociology and governance *Holistic Approach to AI and Leadership* Elsherif,

Hesham Mohamed,2024-06-06 In the current fast paced digital era incorporating Artificial Intelligence AI into leadership practices is a complex challenge The ever evolving technological landscape demands a new approach to leadership that embraces AI while upholding human centric values This convergence of AI and leadership necessitates innovative solutions to stay ahead in a competitive environment The *Holistic Approach to AI and Leadership* offers more than just theory it provides practical solutions for integrating AI into strategic vision This comprehensive guide explores AI s impact on decision making processes training and capacity building addressing resistance and measuring ROI through real world case studies and scenarios Targeting a diverse audience from top tier executives and human resources professionals to AI developers and researchers the book equips leaders with the knowledge to make informed decisions about AI integration By emphasizing the enduring importance of human connection and ethical considerations this approach ensures that technological advancements enhance rather than overshadow the human aspects of leadership reshaping the modern management paradigm A

**Phase Media** James Ash, 2017-12-14 In Phase Media James Ash theorizes how smart objects understood as Internet connected and sensor enabled devices are altering users experience of their environment Rather than networks connected by lines of transmission smart objects generate phases understood as space times that modulate the spatio temporal intelligibility of both humans and non humans Examining a range of objects and services from the Apple Watch to Nest Cam to Uber Ash suggests that the modulation of spatio temporal intelligibility is partly shaped by the commercial logics of the industries that design and manufacture smart objects but can also exceed them Drawing upon the work of Martin Heidegger Gilbert Simondon and Bruno Latour Ash argues that smart objects have their own phase politics which offer opportunities for new forms of public to emerge Phase Media develops a conceptual vocabulary to contend that smart objects do more than just enabling a world of increased corporate control and surveillance as they also provide the tools to expose and re order the very logics and procedures that created them
