*The Oxford Handbook of the Ethiopian Economy* Fantu Cheru, Christopher Cramer, Arkebe Oqubay, 2019-01-10 From a war torn and famine plagued country at the beginning of the 1990s Ethiopia is today emerging as one of the fastest growing economies in Africa Growth in Ethiopia has surpassed that of every other sub Saharan country over the past decade and is forecast by the International Monetary Fund to exceed 8 percent over the next two years The government has set its eyes on transforming the country into a middle income country by 2025 and into a leading manufacturing hub in Africa The Oxford Handbook of the Ethiopian Economy studies this country s unique model of development where the state plays a central role and where a successful industrialization drive has challenged the long held erroneous assumption that industrial policy will never work in poor African countries While much of the volume is focused on post 1991 economic development policy and strategy the analysis is set against the background of the long history of Ethiopia and more specifically on the Imperial period that ended in 1974 the socialist development experiment of the Derg regime between 1974 and 1991 and the policies and strategies of the current EPRDF government that assumed power in 1991 Including a range of contributions from both academic and professional standpoints this volume is a key reference work on the economy of Ethiopia **Area Handbook for Ethiopia** American University (Washington, D.C.). policy responses against the backdrop of the extensive expansion and reform that the system has experienced in recent years Drawing on empirical data generated through interviews policy reviews and focus group discussions it explicates factors of structural inequality ranging from neoliberal policy orientations to repressive gender culture and geo political peripherality In a departure from conventional studies that consider policy a response to social problems the book takes a critical perspective to show the constitutive role of policy and explains how the representation of the problem of social inequality undermines equity policy outcomes in Ethiopian higher education Not only does the book problematise the framing of the problem of inequality in the system it also outlines strategies for designing transformative equity instruments In explaining structural factors of inequality and equity provisions the book productively combines sociological concepts with historical accounts and political economy insights Given the increased economic optimism associated with higher education in sub Saharan Africa and the neoliberal ideals underpinning much of the restructuring of the system in the region this is a timely and important contribution that sheds light on the social justice implications and consequences of such changes It offers fresh accounts of largely neglected qualitative cases of inequality making it a valuable read for students and researchers in the areas of Ethiopian education policy studies international and comparative education and international development
