Ethnic Marketing Culturally Sensitive Theory And Practice:

Ethnic Marketing Guilherme Pires, 2014-12-05 A globalization process epitomised by historically large cross border population movements with rapidly improving networking and communication technologies has resulted in the growth of ethnic diversity across newly industrialised economies Instead of adapting to a dominant host country culture many ethnic minorities seek to preserve their identities both as diasporic communities and within their adopted countries For marketers it has been recognised as crucial to understand the unique needs of these individuals and to develop superior marketing strategies that meet their preferences Ethnic Marketing shows the rich opportunities that ethnic minority communities have to offer as well as offering instruction on the design and implementation of effective social and business marketing strategies The text offers practical guidance on assessing the needs of individual ethnic communities and a guide to marketing to these communities within various countries Since the publication of Pires and Stanton s 2005 book there has been continuing changes in the political social and economic environment in many countries which have growing ethnic minorities Incorporating new research across disciplines on the marketing relevance of ethnic minorities this book also integrates contributions and excerpts from in depth interviews conducted with leading marketing experts whose views and insights stimulate discussion and result in an invaluable guide to best practice in ethnic marketing across the world plus expert insights into the future of this dynamic area This is an excellent resource for researchers and advanced marketing students taking both postgraduate and undergraduate courses in marketing management or strategy as well as government marketing practitioners and businesses seeking ways to reach ethnic communities The Routledge Companion to Ethnic Marketing Ahmad Jamal, Lisa Peñaloza, Michel Laroche, 2015-06-19 The globalization of marketing has brought about an interesting paradox as the discipline becomes more global the need to understand cultural differences becomes all the more crucial This is the challenge in an increasingly international marketplace and a problem that the world s most powerful businesses must solve From this challenge has grown the exciting discipline of ethnic marketing which seeks to understand the considerable opportunities and challenges presented by cultural and ethnic diversity in the marketplace To date scholarship in the area has been lively but disparate This volume brings together cutting edge research on ethnic marketing from thought leaders across the world Each chapter covers a key theme reflecting the increasing diversity of the latest research including models of culture change parenting and socialization responses to web and advertising role of space and social innovation in ethnic marketing ethnic consumer decision making religiosity differing attitudes to materialism acculturation targeting and ethical and public policy issues The result is a solid framework and a comprehensive reference point for consumer researchers students and practitioners *Ethnic Marketing* Guilherme Pires, John Stanton, 2018-12-17 Together with the development of transformative technologies that epitomize globalization the ongoing movements of people across borders and other socio economic pressures are creating a fast changing business environment that is difficult for business to understand let alone

control Dominant social expectations that immigrants should seek to adopt an assimilationist socialization path towards the host country's mainstream are contradicted by minority ethnic group resilience There is no evidence that these groups naturally disappear within the cultural and behavioural contexts of their adopted countries Since ethnic minority consumers cannot be expected to assimilate then they maintain some significant degree of unique ethnicity related consumer characteristics that convert into threats and opportunities for business The inherent socialisation process also provides opportunities for ethnic entrepreneurship and for proliferation of ethnic minority business Following from the extensive examination of scholarly perspectives of ethnic marketing theory there is an acknowledged and marked divide between theoretical exhortations and what is done in practice a relative oversight of the implications of mixed embedded markets and a propensity to overlook the crucial role played by ethnic entrepreneurship and ethnic networks Opportunity valuations are difficult to enact due to a lack of intelligence about ethnic markets Variable sentiment about the future of ethnic marketing links to different predictions on how the drivers of globalization will impact on the acculturation paths of ethnic minorities Keeping a focus on the ethnic group as the unit of analysis combining ethnic marketing and ethnic entrepreneurship theories provides intelligence about contemporary ethnic marketing and practice perspectives The ultimate objective is to reduce the theory practice divide through the development of a collaborative framework between business and scholars that converts into theory in use
