Improving Quality in American Higher Education Richard Arum, Josipa Roksa, Amanda Cook, 2016-05-02

An ambitious comprehensive reimagining of 21st century higher education *Improving Quality in American Higher Education* outlines the fundamental concepts and competencies society demands from today's college graduates and provides a vision of the future for students, faculty, and administrators. Based on a national multidisciplinary effort to define and measure learning outcomes, the Measuring College Learning project, this book identifies essential concepts and competencies for six disciplines. These essential concepts and competencies represent efforts towards articulating a consensus among faculty in biology, business, communication, economics, history, and sociology disciplines that account for nearly 40 percent of undergraduate majors in the United States. Contributions from thought leaders in higher education, including Ira Katznelson, George Kuh, and Carol Geary Schneider, offer expert perspectives and persuasive arguments for the need for greater clarity, intentionality, and quality in U.S. higher education. College faculty are our best resource for improving the quality of undergraduate education. This book offers a path forward based on faculty perspectives nationwide. Clarify program structure and aims. Articulate high quality learning goals. Rigorously measure student progress. Prioritize higher order competencies and disciplinarily grounded conceptual understandings. A culmination of over two years of efforts by faculty and association leaders from six disciplines, this book distills the national conversation into a delineated set of fundamental ideas and practices and advocates for the development and use of rigorous assessment tools that are valued by faculty, students, and society. *Improving Quality in American Higher Education* brings faculty voices to the fore of the conversation and offers an insightful look at the state of higher education and a realistic strategy for better serving our students.

Handbook of Human and Social Conditions in Assessment Gavin T. L. Brown, Lois R. Harris, 2016-06-23

The *Handbook of Human and Social Conditions in Assessment* is the first book to explore assessment issues and opportunities occurring due to the real world of human, cultural, historical, and societal influences upon assessment practices, policies, and statistical modeling. With chapters written by experts in the field, this book engages with numerous forms of assessment from classroom level formative assessment practices to national accountability and international comparative testing practices, all of which are significantly influenced by social and cultural conditions. A unique and timely contribution to the field of Educational Psychology, the *Handbook of Human and Social Conditions in Assessment* is written for researchers, educators, and policy makers interested in how social and human complexity affect assessment at all levels of learning. Organized into four sections, this volume examines assessment in relation to teachers, students, classroom conditions, and cultural factors. Each section is comprised of a series of chapters followed by a discussant chapter that synthesizes key ideas and offers

directions for future research Taken together the chapters in this volume demonstrate that teachers test creators and policy makers must account for the human and social conditions that shape assessment if they are to implement successful assessment practices which accomplish their intended outcomes

Contexts for Assessment and Outcome Evaluation in Librarianship Anne Woodsworth, W. David Penniman, 2012-09-05 This themed volume focuses not on the how of undertaking assessment and outcome evaluations but rather on their successes and failures in various contexts in which these tools have been and will be used
