surviving this whole ordeal was still in the cards At the time it made more sense to me to simply see my situation as a case of bad luck Nonetheless six months later and completely recovered I realized that this was the result of something completely different My love for life and my desire to experience as much as possible had blocked my inner signals It was like an inner voice telling me to Relax Don t try to do everything at once Stop and smell the roses Unfortunately I ignored this worried voice that was trying to look out for me As I took my first stumbling steps leaving the hospital I can still clearly remember how alert my senses truly were Children s laughter made me feel all warm inside The simple beauty of the sky shifting color made me stop all of a sudden in awe Smelling the first spring flowers gave me goose bumps The taste of fresh air being sucked into my lungs made me feel deeply relaxed and the sensation of once again experiencing life made me somewhat euphoric I was completely present in the moment and my senses were sharper than ever before This was the beginning of a new journey for me I started to examine exactly what is needed to create the best possible conditions for feeling good and how we are to create the best possible lives for ourselves Eight years later I have now compiled my research and theories in this book My research has led me to conclude that it is possible for each and every one of us to feel good every day throughout our whole lives
