Lightbody, 2007-05-08. The Foundation for Advances in Medicine and Science FAMS the organizers of SCANNING 98 sponsored its third annual Atomic Force Microscopy Scanning Tunneling Microscopy Symposium at the Omni Inner Harbor Hotel in Baltimore Maryland from May 9 to 12 1998. This book represents the compilation of papers that were presented at the AFM STM Symposium as well as a few that were presented at SCANNING 96 and SCANNING 97 meetings that took place in Monterey California. The purpose of the symposium was to provide an interface between scientists and engineers representatives of industry government and academia all of whom have a common interest in probe microscopies. The meetings offered an ideal forum where ideas could easily be exchanged and where individuals from diverse fields who are on the cutting edge of probe microscopy research could communicate with one another. Experts in probe microscopy from around the world representing a wide range of disciplines including physics biotechnology nanotechnology chemistry material science etc were invited to participate. The format of the meeting was structured so as to encourage communication among these individuals. During the first day sessions papers were presented on general topics such as application of scanning probe microscopy in materials science STM and scanning tunneling spectroscopy of organic materials fractal analysis in AFM and nanomanipulation. Other papers presented included unexpected ordering of a molecule synthesis of peptides and oligonucleotides and analysis of lunar soils from Apollo 11.
