Leong, Michael B. Monagan, Stephen Watt, 2013-12-01 The design and implementation of the Maple system is an on going
project of the Symbolic Com putation Group at the University of Waterloo in Ontario Canada This manual corresponds with
version V roman numeral five of the Maple system The on line help subsystem can be invoked from within a Maple session to
view documentation on specific topics In particular the command updates points the user to documentation updates for each
new version of Maple The Maple project was first conceived in the autumn of 1980 growing out of discussions on the state of
symbolic computation at the University of Waterloo The authors wish to acknowledge many fruitful discussions with
colleagues at the University of Waterloo particularly Morven Gen tleman Michael Malcolm and Frank Tompa It was
recognized in these discussions that none of the locally available systems for symbolic computation provided the facilities that
should be expected for symbolic computation in modern computing environments We concluded that since the basic design
decisions for the then current symbolic systems such as ALTRAN CAMAL REDUCE and MACSYMA were based on 1960 s
computing technology it would be wise to design a new system from scratch Thus we could take advantage of the software
engineering technology which had become available in recent years as well as drawing from the lessons of experience Maple
