*Wars of Ignorance* Robert Schub, Assistant Professor of Political Science Robert Schub, 2025-10-03 *Wars of Ignorance* explains the dangerous pattern of leaders feeling certain they know how war will unfold despite the inherent uncertainties of warfare A leader's misplaced certainty originates in stunted advisory processes leaders consistently silence advisers from the bureaucracy that conducts diplomacy Crucially these advisers are the ones best equipped to judge whether the enemy's political landscape makes war a promising or doomed endeavor Diplomats thus foster peace not because they are doves but because they have unique information that leaders need to accurately gauge the international crises they confront Absent this information leaders risk blundering into war

Chari, Vyjayanti Raghavan, 2015-08-12 This book addresses the compulsions that underlie the China's relations with India and South Korea both increasingly mutually dependent on China for markets trade investments technology tourism etc It inquires into two sets of regional relationships with China being the common linking factor While examining the generational change in the leadership of China India and South Korea this study will be a significant addition to the evolving sphere of comparative regional relations

India's Ocean David Brewster, 2014-03-26 This book assesses India's role as a major power in the Indian Ocean Many see the Indian Ocean as naturally falling within India's sphere of influence but as this book demonstrates India has a long way to go before it could achieve regional dominance The book outlines the development of Indian thinking on its role in the Indian Ocean and examines India's strategic relationships in the region including with maritime South Asia the Indian Ocean islands East Africa the Middle East Southeast Asia and Australia The book then discusses India's ambivalent relationship with the United States and explores its attitude towards China's growing power in the Indian Ocean It concludes by discussing the region's evolving strategic order does India have what it takes to become the leading power in the region

**The Clash of Capitalisms?** Ji Li, 2018-05-24 Chinese foreign direct investment in the United States has generated intense debates Some welcome it for the immediate benefits such as job creation others view Chinese investments especially those controlled by the Chinese government as a critical threat The debates have so far missed an important question how do Chinese companies investing in the US react to the host country's law Ji Li formulates a novel analytical framework to examine the adaptation of Chinese companies to general US institutions and their compliance with US laws governing tax employment equality and national security review of foreign investments The level of compliance varies and this variation is examined in relation to company ownership including state ownership Li's analysis is based on interviews and a unique and comprehensive dataset about Chinese companies in the United States that has never been systematically explored

**China in the 21st Century** Jeffrey N. Wasserstrom, 2013-05-31 The need to understand this global giant has never been more pressing China is constantly in the news yet conflicting impressions abound Within one generation China has transformed from an impoverished repressive state into an economic and political powerhouse In the fully revised and

updated second edition of *China in the 21st Century What Everyone Needs to Know* China expert Jeffrey Wasserstrom provides cogent answers to the most urgent questions regarding the newest superpower and offers a framework for understanding its meteoric rise Focusing his answers through the historical legacies Western and Japanese imperialism the Mao era and the massacre near Tiananmen Square that largely define China's present day trajectory Wasserstrom introduces readers to the Chinese Communist Party the building boom in Shanghai and the environmental fallout of rapid Chinese industrialization He also explains unique aspects of Chinese culture such as the one child policy and provides insight into how Chinese view Americans Wasserstrom reveals that China today shares many traits with other industrialized nations during their periods of development in particular the United States during its rapid industrialization in the 19th century He provides guidance on the ways we can expect China to act in the future vis vis the United States Russia India and its East Asian neighbors The second edition has also been updated to take into account changes China has seen in just the past two years from the global economic shifts to the recent removal of Chongqing Party Secretary Bo Xilai from power Concise and insightful *China in the 21st Century* provides an excellent introduction to this significant global power **Forecasting**

**China's Future** Roger Irvine, 2015-06-26 China's future development is likely to have a huge impact on twenty first century global outcomes It is therefore surprising that thus far so little attention has been given to comparing and evaluating expert forecasts of China's future in the post Mao era This book presents an illuminating and comprehensive summary record of contrasting and competing expert forecasts and judgements about the major issues confronting China within four principal domains political economic environmental and international After considering the principal forecasting methods available to experts the author comments critically on the degree of success achieved in using those methods and emphasises the confusion created by the polarisation of opinion and by the failure of many experts to accept the high degree of uncertainty that characterises most of the key issues The book recommends a new approach based on the study of a hierarchy of critical uncertainties and on continuing analysis of opposing expert opinions about these uncertainties It emphasises the potential for both positive and negative outcomes for these critical uncertainties and the importance of maximising the potential for positive outcomes through improved analytical and policy frameworks Providing insights for specialists and non specialists into the most critical issues that will determine China's future direction this book will be of particular interest to students and scholars of political economic environmental and international relations issues in China and Asia as well as to readers in business and government *China and the Developing World* Joshua Eisemann, Eric Heginbotham, Derek

Mitchell, 2015-08-20 China's relationship with the developing world is a fundamental part of its larger foreign policy strategy Sweeping changes both within and outside of China and the transformation of geopolitics since the end of the cold war have prompted Beijing to reevaluate its strategies and objectives in regard to emerging nations Featuring contributions by recognized experts this is the first full length treatment of China's relationship with the developing world in nearly two

decades Section one provides a general overview and framework of analysis for this important aspect of Chinese policy The chapters in the second part of the book systematically examine China s relationships with Africa the Middle East Central Asia Latin America South Asia and Southeast Asia The book concludes with a look into the future of Chinese foreign policy *The U.S. Army in Asia, 2030-2040* Terrence K. Kelly, 2014-08-22 Looking to the 2030 2040 time frame the U S Army will play an important role in helping U S policy and military strategy strike a balance between cooperating with China and deterring potential Chinese expansionism **China and Africa** David H. Shinn, Joshua Eisenman, 2012-07-10 The People s Republic of China once limited its involvement in African affairs to building an occasional railroad or port supporting African liberation movements and loudly proclaiming socialist solidarity with the downtrodden of the continent Now Chinese diplomats and Chinese companies both state owned and private along with an influx of Chinese workers have spread throughout Africa This shift is one of the most important geopolitical phenomena of our time China and Africa A Century of Engagement presents a comprehensive view of the relationship between this powerful Asian nation and the countries of Africa This book the first of its kind to be published since the 1970s examines all facets of China s relationship with each of the fifty four African nations It reviews the history of China s relations with the continent looking back past the establishment of the People s Republic of China in 1949 It looks at a broad range of areas that define this relationship politics trade investment foreign aid military security and culture providing a significant historical backdrop for each David H Shinn and Joshua Eisenman s study combines careful observation meticulous data analysis and detailed understanding gained through diplomatic experience and extensive travel in China and Africa China and Africa demonstrates that while China s connection to Africa is different from that of Western nations it is no less complex Africans and Chinese are still developing their perceptions of each other and these changing views have both positive and negative dimensions **China's Long March to Freedom** Kate Zhou, 2017-09-08 China is more than a socialist market economy led by ever more reform minded leaders It is a country whose people seek liberty on a daily basis Their success has been phenomenal despite the fact that China continues to be governed by a single party Clear distinctions between the people and the government are emerging underlining the fact that true liberalization cannot be imposed from above Although a large percentage of the Chinese people have been part of China s long march to freedom farmers entrepreneurs migrants Chinese gays sex pleasure seekers and black marketers played a particularly important role in the beginning Lawyers scholars journalists and rights activists have jumped in more recently to ensure that liberalization continues Social dissatisfaction with the government is now published in the media addressed in public forums and deliberated in courtrooms Intellectuals devoted to improvement in human rights and continued liberalization are part of the process This grassroots social revolution has also resulted from the explosion of information available to ordinary people especially via the Internet and far reaching international influences All have fundamentally altered key elements of the moral and material content of China s party state regime and society at large This social

revolution is moving China towards a more liberal society despite its government The Chinese government reacts rather than leads in this transformative process This book is a landmark a decade in the making *India and China in Asia* Jagannath Panda, 2019-04-08 This book analyses the structure of the India China relationship and the two prominent powers positions with and against each other bilaterally and globally in a complex Asian environment and beyond India and China s perceptions of one another are evaluated to reveal how the order of Asia is influenced by engaging in different power equations that affect equilibrium and disequilibrium Contributors address three critical perspectives of India and China in Asia which are increasingly shaping the future of Asia and impacting the Indo Pacific power balance First they examine the mutual perceptions of India and China as an integral part of Asia s evolving politics and the impact of this on the emerging Asian order and disorder Second they assess how classical and contemporary characteristics of the India China boundary and beyond border disputes or conflicts are shaping Asia s political trajectory and leaving an impact on the Indo Pacific region Additionally contributors observe the prevailing power equations in which India and China are currently engaged to reveal that they are not only geographically limited to the Asian region Instead having a strong global or intercontinental character attached to it the India China relationship involves extra territorial powers and extra territorial regions This book will be of interest to academics students and policymakers working on Asian studies international relations area studies emerging powers studies strategic studies security studies and conflict studies

**China's Economy** Arthur R. Kroeber, 2020 China s economic growth has been revolutionary and is the foundation of its increasingly prominent role in world affairs It is the world s second biggest economy the largest manufacturing and trading nation the consumer of half the world s steel and coal the biggest source of international tourists and one of the most influential investors in developing countries from southeast Asia to Africa to Latin America Multinational companies make billions of dollars in profits in China each year while traders around the world shudder at every gyrations of the country s unruly stock markets Perhaps paradoxically its capitalist economy is governed by an authoritarian Communist Party that shows no sign of loosening its grip China is frequently in the news whether because of trade disputes the challenges of its Belt and Road initiative for global infrastructure or its increasing military strength China s political and technological challenges created by a country whose political system and values differ dramatically from most of the other major world economies creates uncertainty and even fear China s Economy What Everyone Needs to Know is a concise introduction to the most astonishing economic and political story of the last three decades Arthur Kroeber enhances our understanding of China s changes and their implications Among the essential questions he answers are How did China grow so fast for so long Can it keep growing and still solve its problems of environmental damage fast rising debt and rampant corruption How long can its vibrant economy co exist with the repressive one party state How do China s changes affect the rest of the world This thoroughly revised and updated second edition includes a comprehensive discussion of the origins and development of the US China strategic rivalry including Trump s

**Shaper Nations** William I. Hitchcock, Melvyn P. Leffler, Jeffrey W. Legro, 2016-04-05 Shaper Nations provides perspectives on the national strategies of eight countries that are shaping global politics in the twenty first century The volume's authors offer a unique viewpoint they live and work primarily in the country about which they write bringing an insider's feel for national debates and politics

*The Making of Global Capitalism* Sam Gindin, Leo Panitch, 2012-10-09 The all encompassing embrace of world capitalism at the beginning of the twenty first century was generally attributed to the superiority of competitive markets Globalization had appeared to be the natural outcome of this unstoppable process But today with global markets reeling and increasingly reliant on state intervention to stay afloat it has become clear that markets and states aren't straightforwardly opposing forces In this groundbreaking work Leo Panitch and Sam Gindin demonstrate the intimate relationship between modern capitalism and the American state including its role as an informal empire promoting free trade and capital movements Through a powerful historical survey they show how the US has superintended the restructuring of other states in favor of competitive markets and coordinated the management of increasingly frequent financial crises The Making of Global Capitalism through its highly original analysis of the first great economic crisis of the twenty first century identifies the centrality of the social conflicts that occur within states rather than between them These emerging fault lines hold out the possibility of new political movements transforming nation states and transcending global markets

**China's Evolving Nuclear Deterrent** Eric Heginbotham, Michael S. Chase, Jacob L. Heim, 2017-03-06 This report analyzes international and domestic factors that will affect China's approach to nuclear deterrence how those drivers may evolve over the next 15 years and what impact they are likely to have

**China in India's Post-Cold War Engagement with Southeast Asia** Chietigj Bajpae, 2022-02-17 This book examines the role of China in driving and sustaining India's post Cold War engagement with Southeast Asia In doing so it provides a unique insight into the regional dimensions of the Sino Indian relationship India launched its Look East Policy in the early 1990s as part of a concerted effort to revive the importance of Southeast Asia in the country's foreign policy agenda This study assesses the role of the China factor defined here as China's regional role which has been interpreted through the prism of the Sino Indian relationship in the inception and evolution of the policy More specifically it establishes the extent to which China has been raised as a priority in discourses of India's Look East Policy and how this has varied over time from the origins of the policy through to the most recent phase of the renamed Act East Policy Addressing the distinction between what policymakers signal in their official statements and their true or underlying motivations the book alludes to the fact that government officials may not

always reflect true intentions in their official statements and it is often what is not said that may reveal more about their real motivations This is particularly relevant in the context of the Sino Indian relationship where diplomatic rhetoric often masks more competitive and confrontational aspects of the bilateral relationship An important analysis of the interplay between India's relations with Southeast Asia and China this book will be of interest to academics policymakers and students in the fields of International Relations Asian Security Southeast Asian politics and in particular Indian foreign policy the Sino Indian relationship and India's Look East Act East Policy *Indian Power Projection* Shashank Joshi, 2017-07-14 India is growing into one of Asia's most important military powers Its defence budget has more than doubled in the past decade and it imports more arms than anyone else in the world But India is still seen as a land power focused on long disputed and militarised borders with Pakistan and China rather than the global military force it was in the first half of the twentieth century under British rule Is this changing India is acquiring increasing numbers of key platforms aircraft carriers amphibious ships refuelling tankers and transport aircraft that are extending its reach to the Indian Ocean littoral and beyond But most accounts of this build up have been impressionistic and partial *Indian Power Projection* assesses the strength reach and purposes of India's maturing capabilities It offers a systematic assessment of India's ability to conduct long range airstrikes from land and sea transport and convey airborne and amphibious forces and develop the institutional and material enablers that turn platforms into capabilities It draws extensively on the lessons of modern expeditionary operations and considers how India's growing interests might shape where and how it uses these evolving capabilities in the future This study finds that Indian power projection is in a nascent stage limited in number primarily of use against much weaker adversaries and deficient in some key supporting capabilities India's defence posture will continue to be shaped by local threats rather than distant interests Indian leaders remain uncomfortable with talk of military intervention and expeditionary warfare associating these with colonial and superpower excess But as the country's power interests and capabilities all grow it is likely that India will once more find itself using military force beyond its land borders *Indo-US Relations* Nirode Mohanty, 2014-12-18 The purpose of this book is to narrate important dynamic events that have taken place in the Indo U S relations beginning from 1943 to 2013 This includes the American role in India's independence the Cold War demise of the Soviet Union resurgence of Islamic fundamentalism terrorists attack of American cities in 2001 decline of American power rise of India and rise of China The study is confined to only three areas terrorism nuclear proliferation and nuclear energy The defining moment of the twenty first century occurred in 2008 when these two estranged great democracies engaged one another to work on common goals and establish a strategic relationship between two natural allies **La presencia de China en el hemisferio occidental** Guadalupe Paz, Riordan Roett, 2009 Con la visita del Presidente Hu Jintao en noviembre de 2004 a Am rica Latina China hizo saber al resto del mundo su creciente inter s por la regi n El avance hacia el as llamado patio trasero de Estados Unidos gener preocupaci n en el c rculo pol tico de ese pa s ya que este movimiento podr a desafiar la primac a

norteamericana en el hemisferio occidental Algunos analistas sin embargo ven el noviazgo de China con Am rica Latina como algo natural debido a su necesidad largoplacista de commodities y soluciones en materia energ tica La presencia de China en el hemisferio occidental presenta una exposici n reveladora y multidisciplinaria de esta relaci n triangular as como tambi n las motivaciones que subyacen a cada uno de los implicados Con ese objetivo expertos de Am rica Latina China Europa y los Estados Unidos reflexionan acerca de las ramificaciones del surgimiento de China como potencia mundial A lo largo de los cap tulos se compagina un marco para anticipar aspectos relacionados con la seguridad en materia econ mica y energ tica en la relaci n entre China y Am rica Latina Este informado an lisis de la pol tica desplegada por China en el hemisferio provee al lector de un panorama exhaustivo centr ndose en un aspecto particularmente sensible de su pac fico ascenso **Look East, Cross Black Waters** Jonah Blank,Jennifer D. P. Moroney,Angel Rabasa,Bonny Lin,2015-10-13 India s core goals for Southeast Asia are in basic harmony with those of the United States including regional stability peaceful settlement of territorial disputes and containment of radicalism Still America should not expect India to enter any sort of alliance nor join any coalition to balance against China but should demonstrate strategic patience and willingness to cultivate a long term relationship
