Grade 1economics Paper Essays 2014:

Economic Growth and the Middle Class in an Economy in Transition Zoya Nissanov,2017-01-24 This book studies the evolution of the middle class in Russia after the fall of the Soviet Union Using data from the RLMS Russian Longitudinal Monitoring Survey the volume covers the period of transition 1991 2008 during which many fundamental economic reforms were implemented The first part of the book is devoted to a discussion of the concept of middle class and a description of the economic situation in Russia during the transition period Particular attention is given to variations in the distribution of Russian incomes and the estimated importance of the middle class The second part of the book focuses on the link between the middle class and income bipolarization The third and last section of the book uses the semiparametric mixture model to discover how many different groups may be derived from the income distribution in Russia as well as what the main socio economic and demographic characteristics of those groups are The mobility of households into and out of the middle class during the transition period is also studied in hopes of determining the factors that contribute to such mobility Using rigorous empirical methods this volume sheds light on a relatively unstudied economic group and provides insight for countries which are about to enter a transition period As such this book will be of great interest to researchers in economics and inequality as well as professionals and practitioners working with international organizations **Generation Jobless?**

P. Vogel,2015-03-05 Offering guidance on the opportunities and threats for future generations and featuring interviews with business leaders this book provides a constructive look at change It directs the youth to become job creators not job seekers and to approach the corporate and political worlds with an entrepreneurial mind set *The Routledge Handbook of the Philosophy of Economics* Conrad Heilmann,Julian Reiss,2021-11-29 The most fundamental questions of economics are often philosophical in nature and philosophers have since the very beginning of Western philosophy asked many questions that current observers would identify as economic The Routledge Handbook of Philosophy of Economics is an outstanding reference source for the key topics problems and debates at the intersection of philosophical and economic inquiry It captures this field of countless exciting interconnections affinities and opportunities for cross fertilization Comprising 35 chapters by a diverse team of contributors from all over the globe the Handbook is divided into eight sections I Rationality II Cooperation and Interaction III Methodology IV Values V Causality and Explanation VI Experimentation and Simulation VII Evidence VIII Policy The volume is essential reading for students and researchers in economics and philosophy who are interested in exploring the interconnections between the two disciplines It is also a valuable resource for those in related fields like political science sociology and the humanities **Land Law and the Extractive Industries** Victoria R

Nalule,2021-08-26 This book analyses the nexus between land access and the extractive industries in Africa specifically highlighting the gaps in energy land and mining laws and the practical solutions needed to settle the increasing number of land disputes in resource rich areas Access to land is essential for the successful operation of energy and mining projects

However there are often social environmental and economic issues associated with acquiring land for these projects Socially many people are relocated economically local communities are not given adequate compensation environmentally pollution negatively impacts on the agricultural and fishing industries relied on by over 80% of the local communities Against this stark background and drawing from the author's fieldwork research this book addresses the important question of whether the different land tenure systems coupled with administration and registration procedures are adequate to address the increasing land disputes in oil and mineral rich African countries

Innovation in China William H.A. Johnson, 2015-07-22

The word innovation is often used today regarding China as if the concept were new to the Eastern country Most people know however that China was a juggernaut in creating new technologies and at one time was the innovation king of the world but that was at least seven centuries ago Today the great oriental power is attempting once again to take the throne of innovation for its own This desire to usurp the throne which had been diligently taken by the West during the Scientific Revolution has placed an almost unrealistic emphasis on innovation In *Innovation in China The Tail of the Dragon* the author explores the issues and actors involved in making innovation the emphasis in China He uses a simple systems model of innovation and various perceptual lenses The lenses are aimed at the historical economic political legal educational and cultural elements of an innovation based society After reading the book the reader will understand more about how innovation is happening in China and by whom More importantly the reader will begin a journey of learning more about where the country is going as it relentlessly continues its drive to create an innovation based society and to become once again in terms appropriate to its history the Emperor of Innovation

Forestry Economics John E. Wagner, 2023-12-22

Forestry Economics introduces students and practitioners to the economics of managing forests and forest enterprises The book adopts the approach of managerial economics textbooks and applies this to the unique problems and production processes faced by managers of forests and forest enterprises What many future forest and natural resource managers need is to understand what economic information is and how to use it to make better business and management decisions John E Wagner draws on his 30 years of experience teaching and working in the field of forest resource economics to present students with an accessible understanding of the unique production processes and problems faced by forest and other natural resource managers The second edition has been updated to include Expanded discussion of compounding discounting and capital budgeting as well as an expanded discussion of when to replace a capital asset that has i costs but no direct revenue stream such as a machine ii costs and a direct annual revenue stream such as a solar array or iii costs and a periodic revenue stream illustrated by the forest rotation problem New practical examples to provide students with applications of the concepts being discussed in the text most notably on New Zealand and a Radiata Pine *Pinus radiata* Plantation A brand new chapter that develops business plans for for profit businesses to illustrate how a business plan is derived from the economic information contained within the Architectural Plan for Profit and how it can be used to make business decisions about
