Making Education Work for the Poor William Elliott, Melinda Lewis, 2018-07-03 Making Education Work for the Poor identifies wealth inequality as the gravest threat to the endangered American Dream Though studies have clearly illustrated that education is the primary path to upward mobility today educational outcomes are more directly determined by wealth than innate ability and exerted effort This accounting directly contradicts Americans understanding of the promise the American Dream is supposed to offer a level playing field and a path

towards a more profitable future In this book the authors share their own stories of their journeys through the unequal U S education system One started from relative privilege and had her way to prosperity paved and her individual efforts augmented by institutional and structural support The other grew up in poverty and had to fight against currents to complete higher education only to find his ability to profit from that degree compromised by student debt To directly counter wealth inequality and make education the great equalizer that Americans believe it to be this book calls for a revolution in financial aid policy from debt dependence to asset empowerment The book examines the evidence base supporting Children s Savings Accounts including CSAs demonstrated potential to improve children s outcomes all along the opportunity pipeline early education school achievement college access and completion and post college financial health It then outlines a policy that builds on CSAs to incorporate a sizable progressive wealth transfer This new policy Opportunity Investment Accounts is framed as the cornerstone of the wealth building agenda the nation needs in order to salvage the American Dream Written by leading CSA researchers the book includes overviews of the major children s savings legislation proposed in Congress and the key features of prominent CSA programs in operation around the country today as well as new qualitative and quantitative CSA research The book ultimately presents a critical development of the theories that together explain how universal progressive asset based education financing could make education work equitably for all American children

Understanding and promoting factors which affect healthy ageing: Physical Activity, Sleep Patterns and nutritional habits Stevo Popovic,Radenko M. Matic,Juel Jarani , David Paar,2024-09-26 A few clear factors are associated with living longer and healthier such as higher levels of physical activity good sleep patterns and proper nutrition However despite all the advances that have been made to increase the general population s physical activity improve their sleep patterns and boost their nutritional habits there is still a lot to be done This Research Topic aims to address the topic of healthy ageing and will consider manuscripts focused on the effects of improving these factors in all ages from childhood to old age We are mainly interested in questions of broader interventions at the individual home settings group school work and gerontology settings and societal level community based settings We also welcome papers investigating the short and long term effects of environmental factors on physical changes in children working and old age populations and their development Correlational and survey studies examining the issues mentioned above are welcome Physical Activity 'Enrichment': A Joint Focus on Motor Competence, Hot and Cool Executive Functions Caterina Pesce,David F. Lakes,2021-04-29 **Health Promotion in Schools, Universities, Workplaces, and Communities** Graça S. Carvalho,Emily Darlington,Teresa Vilaça,2024-12-17 Health education well being improvement and advocacy are effective health promotion strategies among cutting edge Public Health practices Salutogenic perspectives rooted in ecological models have taken their rightful place to empower individuals and communities to change their life ecosystems and preserve and improve their health It is imperative to shift from targeting protective or risk factors which have linear causal relationships

with health conditions and or comorbidities and encompass a systemic understanding of the role of health determinants in creating health Individual collective and structural ecological approaches can better reduce health inequities Moreover engaging the presumed beneficiaries from such strategies ensures that actual needs are identified and choices are context specific It improves the whole implementation process as well as its results Higher levels of participation such as co creation imply a bottom up voluntary collaborative process rooted in values of diversity mutual trust openness autonomy freedom and respect as well as shared expertise responsibility and decision making which are essential values in co creating health promotion
