Science Teaching in Schools Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05 The Committee s report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14 19 year old students based on the International Baccalaureate This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers the quality of careers advice in schools and the importance of practical science in schools Advanced Technology Solar Telescope, Haleakalā, Maui, 2009 Comprehensive Medicinal Chemistry II, Volume 3 John Bodenhan Taylor, D. Racial Reckoning Renee C. Romano, 2014-10-14 Few whites who violently resisted the civil rights struggle were charged with crimes in the 1950s and 1960s But the tide of a long deferred justice began to change in 1994 when a Mississippi jury convicted Byron De La Beckwith for the 1963 murder of Medgar Evers Since then more than one hundred murder cases have been reopened resulting in more than a dozen trials But how much did these public trials contribute to a public reckoning with America's racist past *Racial Reckoning* investigates that question along with the political pressures and cultural forces that compelled the legal system to revisit these decades old crimes A timely and significant work Romano brilliantly demystifies the false binary of villainous white men like Beckwith or Edgar Ray Killen who represent vestiges of a violent racial past with a more enlightened color blind society Considering the current partisan and racial divide over the prosecution of police shootings of unarmed black men this book is a must read for historians legal analysts and journalists interested in understanding the larger meanings of civil rights or racially explosive trials in America Chanelle Rose *American Historical Review* *Suid-Afrikaanse Hofverslae*, 2009 **Learning from the Germans** Susan Neiman, 2019-08-27 As an increasingly polarized America fights over the legacy of racism Susan Neiman author of the contemporary philosophical classic *Evil in Modern Thought* asks what we can learn from the Germans about confronting the evils of the past In the wake of white nationalist attacks the ongoing debate over reparations and the controversy surrounding Confederate monuments and the contested memories they evoke Susan Neiman's *Learning from the Germans* delivers an urgently needed perspective on how a country can come to terms with its historical wrongdoings Neiman is a white woman who came of age in the civil rights era South and a Jewish woman who has spent much of her adult life in Berlin Working from this unique perspective

she combines philosophical reflection personal stories and interviews with both Americans and Germans who are grappling with the evils of their own national histories Through discussions with Germans including Jan Philipp Reemtsma who created the breakthrough Crimes of the Wehrmacht exhibit and Friedrich Schorlemmer the East German dissident preacher Neiman tells the story of the long and difficult path Germans faced in their effort to atone for the crimes of the Holocaust In the United States she interviews James Meredith about his battle for equality in Mississippi and Bryan Stevenson about his monument to the victims of lynching as well as lesser known social justice activists in the South to provide a compelling picture of the work contemporary Americans are doing to confront our violent history In clear and gripping prose Neiman urges us to consider the nuanced forms that evil can assume so that we can recognize and avoid them in the future
