

GCSE Sociology Paper 1 June 2021 Model Answers

3. Feminists, such as Anne Oakley highlight male dominance or patriarchy within the family. This can be seen, for example in the way in which money may be controlled or managed by the man, usually due to the man being the main breadwinner and the woman being the housewife and carer. This may put men in control of important money making decisions, not allowing women to have a say.

4. With the increase in secularisation across Britain, there has been a weakening of religious values, and with that values towards morality and acceptance of different families and relationships have changed. The loss of religion has also had an impact on the political world, for example, in 2013 The Same Sex Marriages Act allowed for some legal parity between heterosexual and homosexual relationships, in the eyes of the law. As a result of these changes, families and households have become more diverse, in this instance with more same-sex couples.

5. The statistics in Item A only provides numerical or quantitative data on the numbers of divorces, it doesn't provide any qualitative data or detailed valid information, for example, the main reasons for divorce.

6. The data in Item A comes from government collected official statistics on the numbers of divorces in England and Wales. The data illustrates that the trend for divorce is generally increasing, which may be explained by a number of reasons. One factor which may account for this increasing trend is the influence of feminism on personal relationships, meaning that women are less likely to accept unequal treatment in a marriage or that women are more likely to be in a stronger financial position to support themselves and their children alone without their husband's financial assistance.

7. One disadvantage of secondary data may be that the information gathered is unrepresentative. As the data isn't collected first-hand, it may not be clear which sociological method was used as the primary form of research. In light of this, it is difficult to see how representative the data is of a range of different social groups. If the research was only conducted in one or two areas, and with a limited number of people, it is unlikely that every class, age, gender, ethnicity, disability and sexuality will have been consulted. This means that the data cannot be seen to be truly representative of the whole population.

8. Willmott and Young used the research method of semi-structured interviews to conduct their study. They interviewed '...almost 2000 individuals living in London' and asked them all the same questions. Their perspective was Functionalism, which centres around the family having a vital purpose to society and its members, with the belief that the nuclear family is the best fit for modern society. Their study centred around the nuclear family in the 1970's and the belief that the roles had become more symmetrical in that domestic responsibilities were increasingly shared between husband and wife in a complimentary manner. As Item B states '...husband and wife were increasingly sharing their chores around the house...' The findings illustrated the changing nature of family life and the personal relationships within it, as a result of the advent and spread of feminism and changes within the law, such as The Equal Pay Act of 1970.

Taiwan and The 'China Impact' Gunter Schubert, 2015-12-14 There can be no doubt that China's economic and political rise is having a stronger effect on Taiwan than on any other country given the Chinese government's claim to sovereignty over Taiwan and Taiwan's quest to maintain its democratic achievements and political identity as a sovereign state Against this background this volume deals with the bigger picture of evolving relations across the Taiwan Strait departing from the observation that China's impact on Taiwan has become stronger over the last 20 years This book analyses the China impact on Taiwan in terms of its social political and security space from both an empirical and conceptual point of view It is the first comprehensive account of China's multifaceted impact on the politics and society of contemporary Taiwan written by renowned scholars from Taiwan Europe and the U S The book covers a wide range of topics including Taiwan's party alignment elections generational politics cross strait political economy immigration policy and security The contributors political scientists and sociologists highlight both the dangers and the opportunities of the China impact for Taiwan and draw a realistic picture of the island republic's current situation and future options in the shadow of its giant neighbour Based on qualitative and quantitative data this volume intends to fill a gap in the Taiwan studies field by studying the China impact on Taiwan's politics and society systematically and from a comparative perspective By doing so it will be of great interest to students and scholars of Taiwan studies and East Asian politics and society more generally

Modernising School Governance Andrew Wilkins, 2016-06-10 Modernising School Governance examines the impact of recent market based reforms on the role of governors in the English state education system A focus of the book concerns how government and non government demands for strong governance have been translated to mean improved performance management of senior school leaders and greater monitoring and disciplining of governors This book addresses fundamental questions about the neoliberal logic underpinning these reforms and how governors are being trained and responsabilised in new ways to enhance the integrity of these developments Drawing on large scale research conducted over three years the book examines the impact of these reforms on the day to day practices of governors and the diminished role of democracy in

these contexts Wilkins also captures the economic and political rationalities shaping the conduct of governors at this time and traces these expressions to wider structural developments linked to depoliticisation decentralisation and disintermediation This book addresses timely and original issues concerning the role of corporate planning and expert handling to state education at a time of increased school autonomy shrinking local government support oversight and tight centralised accountability It will appeal to researchers and postgraduate students in disciplines of education sociology political science public policy and management It will also be of interest to researchers and policy makers from countries with similar or emerging quasi market education systems

Evaluating the Responsibility to Protect Noële

Crossley, 2016-03-31 This book evaluates the extent to which the Responsibility to Protect R2P has consolidated as a norm in international society A consolidated norm in international society is defined here as a regularised pattern of behaviour that is widely accepted as appropriate within a given social context The analysis is based on the assumption that the R2P could be regarded as a consolidated norm if it were applied consistently when genocide and other mass atrocities occur and if international responses routinely conformed to the core principles inherent in the R2P seeking government consent multilateralism prevention and regionalism This book employs Finnemore and Sikkink's norm lifecycle model to determine the putative norm's degree of consolidation with in depth case studies of the international responses to crises in Darfur and Kenya serving to illuminate the findings It advances the argument that whilst the R2P had fully emerged as a prospective norm by 2005 it has not yet fully consolidated as an international norm The R2P has been remarkably successful at pervading the international discourse but has been somewhat less successful at consistency in implementation in terms of adherence to its core principles as outlined above the qualitative dimension of the R2P Furthermore it has been least successful to date in terms of consistency across cases in terms of resolve and tenacity The volume concludes with a reflection on the norm's progress so far and its prospects for further consolidation assuming the R2P continues on its current trajectory This book will be of much interest to students of the Responsibility to Protect humanitarian intervention international law security studies and IR

The War Lawyers Craig Jones, 2020-11-26 Over the last 20 years the world's most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers The War Lawyers examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting

practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence

Greek Slave Systems in their Eastern Mediterranean Context, c.800-146 BC David M. Lewis, 2018-07-12 The orthodox view of slavery in the ancient Mediterranean holds that Greece and Rome were its only genuine slave societies that is societies in which slave labour contributed significantly to the economy and underpinned the wealth of elites Other societies traditionally labelled societies with slaves are thought to have made little use of slave labour and therefore have been largely ignored in recent scholarship This volume presents a radically different view of the ancient Eastern Mediterranean world showing that elite exploitation of slave labour in Greece and the Near East shared some fundamental similarities although the degree of elite dependence on slaves varied from region to region Whilst slavery was indeed particularly highly developed in Greece and Rome it was also economically entrenched in Carthage and played a not insignificant role in the affairs of elites in Israel Assyria Babylonia and Persia The differing degrees to which Eastern Mediterranean elites exploited slave labour represents the outcome of a complex interplay between cultural economic political geographical and demographic factors Proceeding on a regional basis this book tracks the ways in which local conditions shaped a wide variety of Greek and Near Eastern slave systems and how the legal architecture of slavery in individual regions was altered and adapted to accommodate these needs The result is a nuanced exploration of the economic underpinnings of Greek elite culture that sets its reliance on slavery within a broader historical context and sheds light on the complex circumstances from which it emerged

KVS PGT Commerce Book Dheeraj Kumar Singh, An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

Aid in Danger Larissa Fast, 2014-05-14 Humanitarian aid workers increasingly remain present in contexts of violence and are injured kidnapped and killed as a result Since 9 11 and in response to these dangers aid organizations have fortified themselves to shield their staff and programs from outside threats In Aid in Danger Larissa Fast critically examines the causes of violence against aid workers and the consequences of the approaches aid agencies use to protect themselves from attack Based on more than a decade of research Aid in Danger explores the assumptions underpinning existing explanations

of and responses to violence against aid workers According to Fast most explanations of attacks locate the causes externally and maintain an image of aid workers as an exceptional category of civilians The resulting approaches to security rely on separation and fortification and alienate aid workers from those in need representing both a symptom and a cause of crisis in the humanitarian system Missing from most analyses are the internal vulnerabilities exemplified in the everyday decisions and ordinary human frailties and organizational mistakes that sometimes contribute to the conditions leading to violence This oversight contributes to the normalization of danger in aid work and undermines the humanitarian ethos As an alternative Fast proposes a relational framework that captures both external threats and internal vulnerabilities By uncovering overlooked causes of violence Aid in Danger offers a unique perspective on the challenges of providing aid in perilous settings and on the prospects of reforming the system in service of core humanitarian values

Making Progress in Housing Sean McNelis, 2014-01-21 This book presents a new approach to housing research one that is relevant to all the social sciences Housing research is diverse and operates across many disciplines approaches and methods making collaboration difficult This book outlines a methodological framework that enables researchers from many different fields to collaborate in solving complex and seemingly intractable housing problems It shows how we can make progress in housing research and deliver better housing outcomes through an integrated approach Drawing on the work of renowned Canadian methodologist philosopher theologian and economist Bernard Lonergan 1904-1984 McNelis outlines a framework for collaborative research Functional Collaboration This new form of collaboration divides up the work of housing research into functional specialties These distinguish eight inter related questions that arise in the process of moving from the current housing situation through to providing practical advice to decision makers To answer each question a different method is required Making progress in housing is the result of finding new answers to this complete set of eight inter related questions This approach to collaboration opens up a new discourse on method in housing and social research as well as new debates on progress and the nature of science
