Tax Crimes and Enforcement in the European

Union Umut Turksen, Donato Vozza, Reinhard Kreissl, Fanou Rasmouki, 2023-01-12 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. EU member states lose hundreds of billions of euros to tax evasion every year. Tax crimes have a significant impact on the functioning of national and international economies and on the global financial system. Not only do they affect the actors involved and the state that has been deprived of tax revenues but the citizens of those states suffer too. *Tax Crimes and Enforcement in the European Union* presents the findings of the EU funded PROTAX project. Chapters written by leading experts discuss EU and national legal measures and institutional practices to counter anti money laundering, corruption, organised crime and tax evasion. Human factors and their role in countering tax crimes are also considered as well as whistleblower protection legislation which gives readers a rounded view of current practices within the EU. This book provides a timely and valuable comparative study of the legal and institutional background of the prosecution of tax crimes as well as an analysis of legal measures and institutional practices to combat tax crimes on national and EU levels. It also contributes to the development of an advanced European Security Model for understanding human factors in countering tax crimes. It equips policy makers and law enforcement agencies with the dynamic toolkit they need to improve their understanding of tax crimes in the EU and provides solutions for preventing, detecting and investigating tax crimes.

Systemic Risk, Institutional Design, and the Regulation of Financial Markets Anita Anand, 2016-11-24 Following the recent financial crisis regulators have been preoccupied with the concept of systemic risk in financial markets, believing that such risk could cause the markets that they oversee to implode. At the same time they have demonstrated a certain inability to develop and implement comprehensive policies to address systemic risk. This inability is due not only to the indeterminacy inherent in the term systemic risk but also to existing institutional structures which because of their existing legal mandates ultimately make it difficult to monitor and regulate systemic risk across an entire economic system. Bringing together leading figures in the field of financial regulation, this collection of essays explores the related concepts of systemic risk and institutional design of financial markets, responding to a number of questions. In terms of systemic risk, what precisely is the problem and what can be done about it? How should systemic risk be regulated? What should be the role of the central bank, banking authorities and securities regulators? Should countries implement a macroprudential regulator? If not, how is macroprudential regulation to be addressed within their respective legislative schemes? What policy mechanisms can be employed when developing regulation relating to financial markets? A significant and timely examination of one of the most intractable challenges posed to financial regulation.

Geismer, 2022-03-01. The 40-year history of how Democrats chose political opportunity over addressing inequality and how the poor have paid the price. For decades, the Republican Party has been known as the party of the rich, arguing for business-friendly policies like deregulation and tax cuts. But this incisive political history shows that the current inequality crisis was also enabled by a Democratic Party that catered to the affluent. The result is one of the great missed opportunities in political history: a moment when we had the chance to change the lives of future generations and were too short-sighted to take it. Historian Lily Geismer recounts how the Clinton-era Democratic Party sought to curb poverty through economic growth and individual responsibility rather than asking the rich to make any sacrifices. Fueled by an ethos of doing well by doing good, microfinance, charter schools, and privately funded housing developments grew trendy. Though politically expedient and sometimes profitable in the short term, these programs fundamentally weakened the safety net for the poor. This piercingly intelligent book shows how bygone policy decisions have left us with skyrocketing income inequality and poverty in America and widened fractures within the Democratic Party that persist to this day. *Lincoln and Citizenship* Mark E.

Steiner, 2021-04-30. Exploring Lincoln's Evolving Views of Citizenship. At its most basic level, citizenship is about who belongs to a political community, and for Abraham Lincoln in nineteenth-century America, the answer was in flux. The concept of fellow citizens for Lincoln encompassed different groups at different times. In this first book focused on the topic, Mark E. Steiner analyzes and contextualizes Lincoln's evolving views about citizenship over the course of his political career. As an Illinois state legislator, Lincoln subscribed to the by-then-outmoded belief that suffrage must be limited to those who met certain obligations to the state. He rejected the adherence to universal white male suffrage that had existed in Illinois since statehood. In 1836, Lincoln called for voting rights to be limited to white people who had served in the militia or paid taxes. Surprisingly, Lincoln did not exclude women, though later he did not advocate giving women the right to vote and did not take women seriously as citizens. The women at his rallies, he believed, served as decoration. For years, Lincoln presumed that only white men belonged in the political and civic community, and he saw immigration through this lens. Because Lincoln believed that white male European immigrants had a right to be part of the body politic, he opposed measures to lengthen the time they would have to wait to become a citizen or to be able to vote. Unlike many in the antebellum north, Lincoln rejected xenophobia and nativism. He opposed black citizenship, however, as he made clear in his debates with Stephen Douglas. Lincoln supported Illinois's draconian Black Laws, which prohibited free black men from voting and serving on juries or in the militia. Further, Lincoln supported sending free black Americans to Africa, the ultimate repudiation and an antithesis of citizenship. Yet as

president Lincoln came to embrace a broader vision of citizenship for African Americans Steiner establishes how Lincoln's meetings at the White House with Frederick Douglass and other black leaders influenced his beliefs about colonization which he ultimately disavowed and citizenship for African Americans which he began to consider Further the battlefield success of black Union soldiers revealed to Lincoln that black men were worthy of citizenship Lincoln publicly called for limited suffrage among black men including military veterans in his speech about Reconstruction on April 11 1865 Ahead of most others of his era Lincoln showed just before his assassination that he supported rights of citizenship for at least some African Americans
