The Truth About Our Schools Melissa Benn,Janet Downs,2015-11-06 A superb crucial blistering expose of all the myths about our education system that are all too often used to attack it Melissa Benn again proves why she is one of country s most formidable education campaigners and why the powerful should fear her Owen Jones Guardian columnist and best selling author Never has it been more urgent to publicise the truth about what works and doesn t work in our education system Debunking the ideology of marketisation and exposing the half truths that pass for objective reporting Benn and Downs meticulously lay out the evidence that a national system of comprehensive schools delivers the best outcomes This hugely important book should be required reading for each new Education Secretary Caroline Lucas MP

Opinions about comprehensive education are often made into easy to swallow sound bites by media and politicians alike and whilst the benefits of a genuinely comprehensive education for all pupils are obvious untruths have unwittingly evolved into

hard facts Based on Melissa Benn and Janet Downs work as part of the pioneering Local Schools Network The Truth About Our Schools calls for us to urgently and articulately challenge unquestioned myths about state education Benn and Downs have meticulously built an argument for its still enormously vital role and rigorously challenge assumptions that Comprehensive education has failed Local authorities control and hold back schools Choice competition and markets are the route to educational success Choice will improve education in England the free school model Academies raise standards Teachers don't need qualifications Private schools have the magic DNA Progressive education lowers standards Anyone who thinks that comprehensive education cannot deliver that local authorities are the chief block to improving our school system that competition and markets are the route to educational success and that private schools hold the magic DNA that can simply be transferred to other state schools will have their beliefs shaken by this blisteringly incisive book *Media Studies 2.0* William Merrin, 2014-03-21 *Media Studies 2.0* offers an exploration of the digital revolution and its consequences for media and communication studies arguing that the new era requires an upgraded discipline a media studies 2.0 The book traces the history of mass media and computing exploring their merger at the end of the twenty century and the material ecological cultural and personal elements of this digital transformation It considers the history of media and communication studies arguing that the academic discipline was a product of the analogue broadcast era emerging in the early twentieth century as a response to the success of newspapers radio and cinema and reflecting that era back in its organisation themes and concepts Digitalisation however takes us beyond this analogue era media studies 1.0 into a new post broadcast era Merrin argues that the digital era demands an upgraded academic discipline one reflecting the real media life of its students and teaching the key skills needed by the twenty first century user Media 2.0 demand a media studies 2.0 This original and critical overview of contemporary developments within media studies is ideal for general students of media and communication as well as those specifically studying new and digital media Testing Times Willis Richard, 2014-02-07 This book focuses on the delivery of public examinations offered by the main examining boards in England since Victorian England The investigation reveals that the provision of examinations was as controversial in the nineteenth century as it is today particularly since the government is now determined to bring in reform The issues of grade inflation the place of coursework in marking and the introduction of technological change all feature in this book Educational policy is primarily examined as well as some reference to the global scene The study analyses archival material from a wide range of sources including those records stored at the National Archives and the London Metropolitan Archives An emphasis is placed upon the various institutions that contributed to the process including the Royal Society of Arts the London Chamber of Commerce the City of Guilds of London Institute and the University of London Attention is given to the findings of the Taunton Commission and the Bryce Commission and shorter reports such as the Northcote Trevelyn Report which served to radicalise entry and recruitment to the Civil Service The modern GCSE and the plans for I levels are considered and key observations

are made about the efficacy of those examinations offered by Oxford and Cambridge universities and O levels A levels and NVQs The reader is given every opportunity to benefit enthusiastically in this account of examinations and those engaged in education whether teachers examiners students or administrators will be able to gain useful insights into the workings of the examination system **What is a Mathematical Concept?** Elizabeth de Freitas,Nathalie Sinclair,Alf Coles,2017-06-22

Responding to widespread interest within cultural studies and social inquiry this book addresses the question what is a mathematical concept using a variety of vanguard theories in the humanities and posthumanities Tapping historical philosophical sociological and psychological perspectives each chapter explores the question of how mathematics comes to matter Of interest to scholars across the usual disciplinary divides this book tracks mathematics as a cultural activity drawing connections with empirical practice Unlike other books in this area it is highly interdisciplinary devoted to exploring the ontology of mathematics as it plays out in different contexts This book will appeal to scholars who are interested in particular mathematical habits creative diagramming structural mappings material agency interdisciplinary coverings that shed light on both mathematics and other disciplines Chapters are also relevant to social sciences and humanities scholars as each offers philosophical insight into mathematics and how we might live mathematically *The Times Index* ,2013 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Time educational supplement Scotland and the Times higher education supplement Understanding and Applying Assessment in Education

Damian Murchan,Gerry Shiel,2024-04-09 All teachers are responsible for assessing the children they teach and the outcomes of any assessment are important for individual learners schools and wider education systems Designed as a pragmatic guide for new teachers and those training to teach this book is your one stop shop for understanding assessment in schools It covers formative and summative approaches used across primary and secondary education supporting a balanced overview with policy examples drawn from the UK Ireland and wider international contexts This updated second edition reflects recent trends in assessment and includes more balanced coverage across primary and secondary age phases with a broader range of examples across curriculum subject areas a new chapter on the potential of digital assessment for both formative and summative purposes the impact of the COVID 19 pandemic on assessment in general and examinations in particular Damian Murchan is Associate Professor in the School of Education at Trinity College Dublin Gerry Shiel is a Research Fellow at the Educational Research Centre Dublin Ireland **Headstrong: 11 Lessons of School Leadership** Dame Sally

Coates,2015-02-23 Drawing on 40 years of working in challenging schools and a decade of leading some of the toughest schools in London this book shows aspiring leaders how to create vibrant centres of learning in our most broken communities Headstrong will resonate with ambitious leaders beyond education It consists of 11 chapters each exploring one aspect of the challenge of leadership **Debates in Mathematics Education** Gwen Ineson,Hilary Povey,2020-06-15 This new and updated second edition of Debates in Mathematics Education explores the major issues that mathematics teachers encounter

in their daily lives By engaging with established and contemporary debates this volume promotes and supports critical reflection and aims to stimulate both novice and experienced teachers to reach informed judgements and argue their point of view with deeper theoretical knowledge and understanding Divided into five accessible sections this book investigates and offers fresh insight into topics of central importance in mathematics education with this second edition including new discussions and chapters on Classic and contemporary issues of pedagogy politics philosophy and sociology of mathematics education International comparisons of achievement Digital technologies for teaching Mastery in mathematics Pop culture and mathematics Whether mathematics can be harmful Designed to stimulate discussion and support you in your own research writing and practice through suggested questions and activities throughout Debates in Mathematics Education will be a valuable resource for any student or practising teacher and those engaged in initial teacher education continuing professional development or Master s level study This book also has much to offer to those leading mathematics departments in schools and initial teacher education programmes and to beginning doctoral students looking for a survey of the field of mathematics education research **Numerical Simulation, An Art of Prediction 1** Jean-François Sigrist,2019-12-18

Numerical simulation is a technique of major importance in various technical and scientific fields Used to understand diverse physical phenomena or to design everyday objects it plays a major role in innovation in the industrial sector Whilst engineering curricula now include training courses dedicated to it numerical simulation is still not well known in some economic sectors and even less so among the general public Simulation involves the mathematical modeling of the real world coupled with the computing power offered by modern technology Designed to perform virtual experiments digital simulation can be considered as an art of prediction Embellished with a rich iconography and based on the testimony of researchers and engineers this book shines a light on this little known art It is the first of two volumes and focuses on the principles methods and industrial practice of numerical modeling Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons,2014

Processing Symbolic Numerical Information and its Implications for Mathematics Learning Ricardo Moura,Julia Bahnmueller,Vitor Geraldi Haase,Júlia Beatriz Lopes-Silva,Korbinian Moeller,2022-06-21 English and Development Elizabeth J. Erling,Philip Seargeant,2013-05-16 This book investigates the relationship between English and personal and national development in the era of globalization It addresses the effects that the increased use of English and the promotion of English language education are having in developmental contexts and their impact on broader educational issues
