Sewell, 2021-04-28 There is little doubt that the French Revolution of 1789 changed the course of Western history. But why did the idea of civic equality, a distinctive signature of that revolution, find such fertile ground in France? How might changing economic and social realities have affected political opinions? William H. Sewell Jr. argues that the flourishing of commercial capitalism in eighteenth-century France introduced a new independence, flexibility and anonymity to French social life. By entering the interstices of this otherwise rigidly hierarchical society, expanded commodity exchange colored everyday experience in ways that made civic equality thinkable, possible, even desirable when the crisis of the French Revolution
