

Lexus RX 350 2007-2009 Workshop Manual

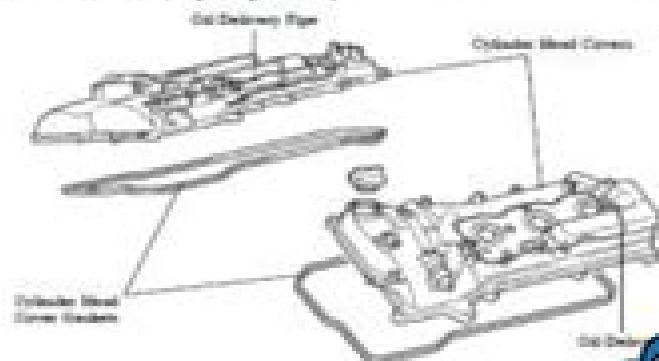

24

ENGINE — NEW FEATURES

3. Engine Proper

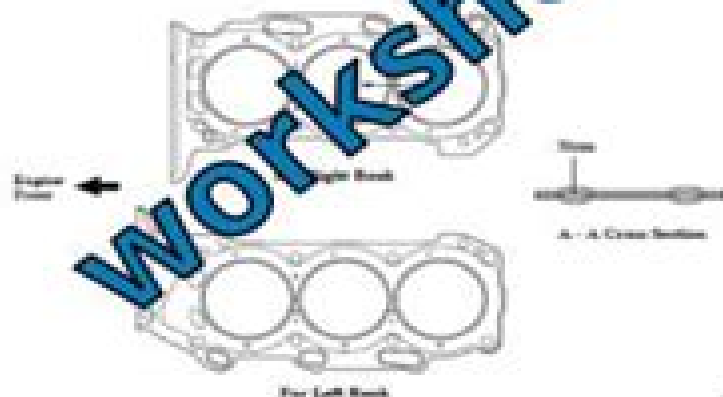

Cylinder Head Cover

- Lightweight yet high-strength aluminum cylinder head covers are used.
- An oil delivery pipe is installed inside the cylinder head cover. This ensures lubrication to the sliding parts of the roller rocker arms, improving reliability.

Cylinder Head Gasket

Steel laminae type cylinder head gaskets are used. A steel is used in the center of each gasket to help enhance sealing performance and durability.

ENGINE — NEW FEATURES

25

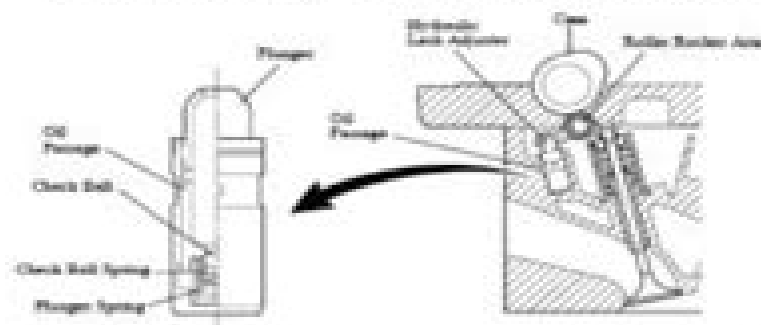

Timing Chain Cover

The timing chain cover has an integrated oil pump, consisting of oil pump and oil passage, and the lubrication system (oil pump and oil passage) is designed to reduce weight.

Hydraulic Lash Adjuster

- The hydraulic lash adjusters, which are located at the fulcrum (pivot point) of the roller rocker arms, each consist primarily of a plunger, plunger spring, check ball, and check ball spring.
- Both the engine oil that is supplied by the cylinder head and the built-in spring actuate the hydraulic lash adjusters. The oil pressure and the spring force that act on the plunger push the roller rocker arms against the cam, in order to adjust the clearance between the valve stems and rocker arms. This prevents the generation of noise during the opening and closing of the valves. As a result, engine noise is reduced.

Service Tip

Valve clearance adjustment is not necessary because hydraulic lash adjusters are used on this model.
