Difficult Subjects Badia Ahad-Legardy, OiYan A. Poon, 2023-07-03 Difficult Subjects Insights and Strategies for Teaching about Race Sexuality and Gender is a collection of essays from scholars across disciplines institutions and ranks that offers diverse and multi faceted approaches to teaching about subjects that prove both challenging and often uncomfortable for both the professor and the student It encourages college educators to engage in forms of practice that do not pretend that teachers and students are unaffected by world events and incidents that highlight social inequalities Readers will find the collected essays useful for identifying new approaches to taking on the difficult subjects of race gender and sexuality The book will also serve as inspiration for academics who believe that their area of study does not allow for such pedagogical inquiries to also teach in ways that address difficult subjects Contributors to this volume span a range of disciplines from criminal justice to gender studies to organic chemistry and demonstrate the productive possibilities that can emerge in college classrooms when faculty consider

identity as constitutive of rather than divorced from their academic disciplines Discussions of race gender and sexuality are always hot button issues in the college classroom whether they emerge in response to a national event or tragedy or constitute the content of the class over a semester long term Even seasoned professors who specialize in these areas find it difficult to talk about identity politics in a room full of students And many professors for whom issues of racial and sexual identity is not a primary concern find it even more challenging to raise these issues with students Offering reflections and practical guidance the book accounts for a range of challenges facing college educators and encourages faculty to teach with courage and conviction especially when it feels as though the world around us is crashing down upon our students and ourselves

tells Purdue's story through rare images, artifacts, and words. Authors culled decades of student papers, from scrapbooks, yearbooks, letters, and newspapers to historical photographs and memorabilia preserved in the Purdue University Libraries Virginia Kelly Karnes Archives and Special Collections. Many of the images and artifacts included have never been published, presenting a unique history of the land grant university from the student perspective. Purdue at 150 is organized by decade, presenting a scrapbook-like experience of viewing over 400 rare photographs, documents, and artifacts alongside critical contextual information. Each chapter provides a decadal historical sketch of Purdue University, offering insight into the institution's unique culture while incorporating campus responses to major national events such as world wars and the Great Depression. Spotlight sections highlight Purdue firsts, including the first graduates of programs, the growth and development of the international student population at Purdue, the creation of significant student organizations, and the foundations of both old and new campus traditions. This curated journey through the personal experiences, spaces, and events of Purdue's history not only celebrates major accomplishments and acknowledges the contributions Purdue has made to society but it also explores some of the challenges and tragedies that shaped Indiana's land grant university. As a result, Purdue at 150 connects the identity and character of the University of 1869 to the University of 2019 and beyond, as told through the stories of its students. Running throughout this journey is the enduring vision of the land grant institution and its impact on society, as seen through the material culture of Boilermakers from around the world.

Equity and Internationalization on Campus Kaela Jubas, 2018-09-11. Every day we hear how people, organizations, and ideas are moving across borders. We also hear about fairness and justice as fundamental social values. How, though, do these two discourses—one related to internationalization and the other to equity—converge in lived experience? The post-secondary institution is one setting where that question might be asked, and people who are minoritized for their gender or sexual identities can provide important answers. While equity-oriented discourses assure LGBT people that they will be free from harassment and discrimination, an internationalization discourse might call them to engage in places where they are illegal. *Equity and Internationalization on Campus* shares findings from a Canadian study that explored how LGBT or ally post-secondary faculty, students, and staff encountered these two discourses. It offers much to scholars and staff committed to developing an equitable version of internationalization and an international version of equity.

Neuroscience, Learning and Educational Psychology María Jesús Luque Rojas, Eduardo Blanco Calvo, María Teresa Martín-Aragoneses, 2022-08-25. *Resources in Education*, 1982. Modern Mathematics Dirk De Bock, 2023-03-08. The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century. It attracted the attention of local and international politicians, of teachers, and of parents, and influenced the teaching and learning of mathematics at all levels, kindergarten to college graduate, in many nations. After garnering much initial support, it began to attract criticism. But as Bill Jacob and the late Jerry Becker show in Chapter 17,

some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends
