Intelligent Computer Mathematics Jacques Carette, Lucas Dixon, Claudio Sacerdoti Coen, Stephen Watt, 2009-07-06 As computers and communications technology advance greater opportunities arise for intelligent mathematical computation While computer algebra automated deduction and mathematical publishing each have long and successful histories we are now seeing increasing opportunities for synergy among them The Conferences on Intelligent Computer Mathematics cicm 2009 is a collection of co located meetings allowing researchers and practitioners active in these related areas to share recent results and identify the next challenges The specific areas of the cicm conferences and workshops are described below but the unifying theme is the computerized handling of mathematical knowledge The successful formalization of much of mathematics as well as a better understanding of its internal structure makes mathematical knowledge in many ways more tractable than general knowledge as traditionally treated in artificial intelligence Similarly we can also expect the problem of effectively using mathematical knowledge in automated ways to be much more tractable This is the goal of the work in the cicm conferences and workshops In the long view solving the problems addressed by cicm is an important milestone in formulating the next generation of mathematical software
