The Mathematics Playbook John Almarode, Kateri Thunder, Michelle Shin, Douglas Fisher, Nancy Frey, 2024-01-28 This is a playbook about teaching and learning mathematics. It is not just focused on the content skills, procedures, conceptual understandings, and application of mathematics, but the teaching and learning of mathematics in our schools and classrooms. From counting to conic sections, patterns to permutations, radii to rational equations and fractions to fractals, the questions we aim to answer include: 1. How do we foster, nurture, and sustain mathematics learning? 2. How do we approach the teaching and learning of mathematics to ensure all learners have equity of access and opportunity to the highest level of mathematics learning possible? 3. What are the non-negotiables in a high-quality mathematics task? 4. How do we know if learners really get it? These are the questions the authors strive to address in this playbook.
