Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02

South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Good Regulation, Bad Regulation Imad A. Moosa, 2016-01-12

Since the 2007-2008 global financial crisis there has been much debate about the role of financial regulation and the causes of financial instability in the industry. Where studies commonly question the value of a regulated rather than free market, this book focuses on the differentiation of good regulation and bad regulation. This book highlights the need for financial regulation to combat corruption and the integral link that exists between corruption and financial instability. The author evaluates the benefits and shortcomings of specific types of regulation, drawing on recent examples to illustrate each argument. The book presents compelling arguments for the regulation of leverage, liquidity, payday loans and securitisation and debates the negative aspects of the regulation of short selling and high frequency trading and of Basel style banking regulation. The author argues that there is no free market solution to financial instability and rejects the idea of too big to fail.

Bicycle or Unicycle?: A Collection of Intriguing Mathematical Puzzles Daniel J. Velleman, Stan Wagon, 2020-08-17 Bicycle or Unicycle is a collection of 105 mathematical puzzles whose defining characteristic is the surprise encountered in their solutions Solvers will be surprised even occasionally shocked at those solutions The problems unfold into levels of depth and generality very unusual in the types of problems seen in contests In contrast to contest problems these are problems meant to be savored many solutions all beautifully explained lead to unanswered research questions At the same time the mathematics necessary to understand the problems and their solutions is all at the undergraduate level The puzzles will nonetheless appeal to professionals as well as to students and in fact to anyone who finds delight in an unexpected discovery These problems were selected from the Macalester College Problem of the Week archive The Macalester tradition of a weekly problem was started by Joseph Konhauser in 1968 In 1993 Stan Wagon assumed problem generating duties A previous book written by Wagon Konhauser and Dan Velleman Which Way Did the Bicycle Go gathered problems from the first twenty five years of the archive The title problem in that collection was inspired by an error in logic made by Sherlock Holmes who attempted to determine the direction of a bicycle from the tracks of its wheels Here the title problem asks whether a bicycle track can always be distinguished from a unicycle track You ll be surprised by the answer
