

Engine identifying features

- ▲ The same engine, jointly developed by BMW Group and DaimlerChrysler, is used in both M52 versions. The main visual difference between the two is that the supercharged engine (Cooper S) is equipped with the supercharger on the lower right front of the engine and the intercooler housing on the top and front of the engine.

ENGINE CONSTRUCTION

The engine block and bearing support ladder are constructed from cast iron with an aluminum alloy cylinder head. The oil pan is manufactured from aluminum alloy to reduce weight. Despite the iron block and bearing ladder, the engine is very light at 129.22 kg (285 lb). Main features of the engine include:

- 16 valves
- Single overhead chain driven camshaft
- Hydraulic lifters
- Engine drive belt with automatic tension adjustment
- Supercharger (Cooper S models)

Engine block

The engine block is manufactured in two halves from sand cast nodular iron. The top portion (main cylinder block) includes the cylinder bores and has provisions for five main bearing top shells. The lower portion (bearing support ladder) incorporates the lower main bearing shells and support for the rear main oil seal.

The engine block and ladder are machined as a matched pair and are not serviced as individual components. Three locating dowels are used to ensure perfect alignment between the bearing ladder and the engine block. A number is stamped on the engine block and the same number is stamped on the bearing ladder. This ensures that the matched pair of components remain together during engine assembly. The engine plant code number is also stamped in the block.

Not just an Eastern practice any more, Feng Shui can be found around the globe. Feng Shui is an art that stresses the importance of living in harmony with nature. The Chinese believe that the earth has channels of energy known as dragon lines, comparable with the meridians of the human body, and the buildings, towns, and rooms should be designed and constructed so as not to obstruct these channels. According to the principles of Feng Shui, living in harmony with the earth's field of energy will promote prosperity, peace, and happiness. *Living Earth Feng Shui* is a fascinating book which outlines how Feng Shui can be applied on a small or large scale in the busiest cities or the smallest room. Author Stephen Skinner outlines its history and philosophy, clearly showing how it can be used to determine the site and arrangement of dwelling places in order to enhance the quality of life of the inhabitants.
