Miss Donohue And Other Stories:

News and the Human Interest Story Helen MacGill Hughes, 1981 In this account of the growth of newspapers in modern industrial society Helen Hughes traces the development of a mass audience through analysis of the origins of the human interest story in the popular ballads of an earlier day She shows how such commonly found interests as a taste for news of the town ordinary gossip and moving or gripping tales with a legendary or mythic quality have reflected the tastes of ordinary folk from the days of illiterate audiences to the present She explains how these interests ultimately were combined with practical economic and political information to create the substance and demand for a popular press In describing the rise and fall of newspaper empires each with their special readership attractions Dr Hughes shows how technological innovation and idiosyncratic creativity were used by owners to capture and hold a reading audience Once this audience developed it could be fed a variety of messages beamed at reinforcing and maintaining both general and specific publics as well as a view of the world consonant with that of the publisher and major advertisers Hughes offers a persuasive argument for the continuing viability of this method for combined social control instruction and amusement captured by the association of news and the human interest story
