

My Teaching Philosophy as a Teacher

Teachers have a huge role to teach the future generations. They must be effective and good at what they do to make sure the students are successful. Teachers all vary in their philosophies about education and learning. When I took the Philosophy for Education test, I agreed with the Romanticism philosophies. I believe that the emphasis of learning should be focused primarily on the students. The classroom should be a positive learning environment for the kids to come to every day. The students should have a love for learning and their teacher as well. Education serves a purpose to make the students strong in all aspects of themselves, not just their minds. They should also be taught to have good morals to be successful. I also relate to the Essentialism philosophies of education. I believe that students must learn important content knowledge. I also think teaching strategies that have been proven to work should be used by teachers. I also think that parts of the progressivism philosophy is valuable as well. Students should learn through experience and learning to work with one another. I also believe Constructivism is important in the classroom. Teachers shouldn't just look at the students to be filled with their information that they have for them; instead, teachers need to create learning situations for students to build their own knowledge.

I have the beliefs that I do from my personal experiences. In school, I always loved the teachers that I was able to connect with and I learned so much from them. It is so much easier to learn in a positive learning environment where you want to learn and engage in the classroom. I also had the wonderful opportunity to intern for a kindergarten teacher my senior year of high school. A lot of my teaching philosophies that I believe was how she ran her classroom. She ran a very efficient classroom and made sure the

Jesse Stuart On Education J.R. LeMaster, 2021-12-14 Could a man who never earned a master's degree tell the nation's teachers and administrators how to run their schools? Jesse Stuart, who had a life-long love of education, did just that. From Stuart's autobiographical works, J.R. LeMaster has chosen selections that demonstrate his philosophy of learning and teaching and his philosophy of life. The selections establish a loose chronology of events in Stuart's lifelong education and describe his experience as preschooler, student, teacher, and school administrator. This multiple perspective, LeMaster suggests, is essential to understanding the process we call education: a process Jesse Stuart located in nature, believing that human beings are first and foremost natural beings and only incidentally cultural beings. That is, while we belong to an order of human beings, we also belong to a larger order, a universe of living things. In his general introduction, LeMaster discusses Stuart's life and philosophy, providing the reader with a backdrop against which to study selections from *Beyond Dark Hills*, *The Thread That Runs So True*, *The Year of My Rebirth*, *God's Oddling*, *Mr. Gallion's School*, *To Teach To Love*, and other Stuart works. Each excerpt is illumined by LeMaster's discussion of its place in Stuart's philosophy of education. Those concerned with the apparent breakdown of the American educational system will find much to consider in LeMaster's discussion of the implications of Stuart's views on education. He contends that the present crisis in our schools stems from an inadequate philosophy for living and that Jesse Stuart, who believed education was a natural development, knew as much all along.

Also included are a selection of his challenging philosophical puzzles. Babbage, 2011-05-16 The dream of teaching is that a career in teaching can be fascinating, meaningful, inspiring, and rewarding. The reality of teaching is that a career in teaching can be exhausting, frustrating, heart-breaking, and disappointing. How can the dream endure and thrive while the reality is confronted and mastered? Keen Babbage guides prospective teachers through an analysis of the profession they are considering and of their match with that profession. For one who is already in a teaching career, this book gives the reader an opportunity to reflect on progress that has been made, problems that have been encountered, and how to hold onto the dream of teaching while facing the increasingly complex reality of teaching. **Participatory Literacy Practices for P-12 Classrooms in the Digital Age** Mitchell, Jessica S., Vaughn, Erin N., 2019-10-11 The ability to effectively communicate in a globalized world shapes the economic, social, and democratic implications for the future of P-12 students.
