Elevator Owner Manual Europe:

High-rise Manual Johann Eisele, Ellen Kloft, 2003 What constitutes a high rise building A high rise is in fact any building with more than 9 storeys and not just those striking skyscrapers which shape modern city skylines In the past architects who designed such structures used to be the exception but in the last 10 years more and more architectural offices have begun to focus on this type of building However the sheer complexity of designing and planning the construction of a high rise as opposed to other building types requires a wealth of specialized experience and expertise The High Rise Manual is the first comprehensive reference work on this subject All relevant aspects of such an undertaking are examined in detail by some 24 specialist authors Each step is extensively documented including the initial project planning the building organisation the laying of the foundations the supporting structure the building technology the office design and the Facility Management Theoretical contributions present the basic principles of select

one of aviation's most notable dangerous and entertaining pursuits airshows In the early days of aviation all flights were airshows Spectators gathered whenever a new flying machine attempted to leave the ground the trick was to get them to pay Takeoffs and landings did not sell tickets but people lined up money in hand to watch a dip of death in which an aviator would dive from as high as he or she dared and pull up at the last second Risk always sells and flying was man's riskiest endeavor yet From the start the exhibition pilots stood out Everything about an aerobatic routine requires a degree of skill and a commitment to practice inconceivable to even most pilots presenting innumerable risks to life and limb And with risk often comes tragedy The Crowd Pleasers is a sweeping history of air show accidents beginning in 1910 with the death of Charles Rolls co founder of Rolls Royce and ending in the present day It brings to light some of the most notable air show accidents of all time and explores the aviators behind them Their stories their motivations In so doing it illuminates the role played by choice social circumstance and fate in these often devastating accidents and the lives attached to them A must read for all aviation buffs *The American Elevator and Grain Trade* ,1918
