 is on full display here James McBride National Book Award winning author Innovation in China William H.A.  
 Johnson,2015-07-22 The word innovation is often used today regarding China as if the concept were new to the Eastern  
 country Most people know however that China was a juggernaut in creating new technologies and at one time was the  
 innovation king of the world but that was at least seven centuries ago Today the great oriental power is attempting once  
 again to take the throne of innovation for its own This desire to usurp the throne which had been diligently taken by the West  
 during the Scientific Revolution has placed an almost unrealistic emphasis on innovation In Innovation in China The Tail of  
 the Dragon the author explores the issues and actors involved in making innovation the emphasis in China He uses a simple  
 systems model of innovation and various perceptual lenses The lenses are aimed at the historical economic political legal  
 educational and cultural elements of an innovation based society After reading the book the reader will understand more  
 about how innovation is happening in China and by whom More importantly the reader will begin a journey of learning more  
 about where the country is going as it relentlessly continues its drive to create an innovation based society and to become  
 once again in terms appropriate to its history the Emperor of Innovation The Complete Book of Colleges, 2013 Edition
