management is indispensable in order to secure its own existence in the long term. The rapid changes on many markets and in many countries also mean that professional information gathering and processing of market relevant data must take place within the framework of international market research. Based on this data, market oriented decisions have to be made within international marketing management in order to achieve operational goals. This book deals not only with the classic topics of international marketing such as international market research and the international use of individual marketing instruments but also with the various management sub functions of planning, controlling, organization and human resources management in internationally active companies, each with a specific reference to marketing in the sense of market oriented corporate management. The theoretically presented correlations are enriched by current data on the relevant framework conditions on international markets, empirical findings on the individual fields of action of international marketing management as well as numerous current examples from entrepreneurial practice. With this comprehensive presentation of international marketing management, the authors address lecturers and students as well as practitioners who deal with marketing issues in an international context. Ethical Issues in International Marketing Erdener Kaynak, Nedjet Delener, 2019-09-16. Ethical Issues in International Marketing is a valuable resource for readers, increasing need for knowledge of this important area. In recent years, ethical issues in international marketing have come to the forefront due to publicity and controversy generated from several international cases of questionable ethics. To date, little research has been conducted in the area of international marketing ethics. Delener's book

comes at an important time to alert readers to the growing concern for greater ethical behavior in the international marketing arena. It provides illustrations to give readers hands-on experiences that can transfer directly into the marketing world. Delener and his contributing authors identify the unique importance of ethics and corporate social responsibility in global markets. *Ethical Issues in International Marketing* was conceived to allow researchers the liberty to explore the topic in the context of an environment supportive of the difficulties associated with this type of research. The contributing authors discuss these main topics: A social contract for analyzing and evaluating the activities of transnational corporations in developing countries; The relationship of marketing ethics to gray markets for consumer goods; How moral commitment is shaped by socialization and role of culture in Turkey; The relationship between Egyptian consumers' ideology and their perceptions of ethical behavior. Readers who desire to make steps toward better global decisionmaking will find this a compelling book. The authors make readers realize that conducting business transactions efficiently and effectively in a mere technocratic sense is no longer sufficient. Ethical issues in the international marketing environment are best addressed in learning more about the differences between cultures, which this book begins to do.
