Multilingual Learning and Language Supportive Pedagogies in Sub-Saharan Africa Elizabeth J. Erling, John Clegg, Casmir M. Rubagumya, Colin Reilly, 2021-07-01 This edited collection provides unprecedented insight into the emerging field of multilingual education in Sub Saharan Africa SSA Multilingual education is claimed to have many benefits amongst which are that it can improve both content and language learning especially for learners who may have low ability in the medium of instruction and are consequently struggling to learn The book represents a range of Sub Saharan school contexts and describes how multilingual strategies have been developed and implemented within them to support the learning of content and language It looks at multilingual learning from several points of view including translanguaging or the use of multiple languages and especially African languages for learning and language supportive pedagogy or the implementation of a distinct pedagogy to support learners working through the medium of a second language The book puts forward strategies for creating materials classroom environments and teacher education programmes which support the use of all of a student's languages to improve language and content learning The contexts which the book describes are challenging including low school resourcing poverty and low literacy in the home and school policy which militates against the use of African languages in school The volume also draws on multilingual education approaches which have been successfully carried out in higher resource

countries and lend themselves to being adapted for use in SSA It shows how multilingual learning can bring about transformation in education and provides inspiration for how these strategies might spread and be further developed to improve learning in schools in SSA and beyond Chapter 3 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

followed by a chapter on the history of such planning in Ethiopia It then presents the methodology used for the study and examines the appropriation of hegemonic LPP patterns of resistance schools and public sites as centers of resistance and the emergence and development of specific patterns of language use in different regions of the country The book ends with recommendations for future research and draws the overall conclusion that since LPP is a dynamic and multilayered contextual process official or de facto language policy is often undermined by overt or covert unofficial language policies ideologies mechanisms and agents that result in different patterns of language use
