Etrac Inverter Manual:

Aerospace Actuators 3 Jean-Charles Maré, 2018-01-19 This book is the third in a series dedicated to aerospace actuators. It uses the contributions of the first two volumes to conduct case studies on actuation for flight controls, landing gear, and engines. The actuation systems are seen in several aspects: signal and power architectures, generation and distribution of hydraulic or mechanical power, control and reliability, and evolution towards more electrical systems. The first three chapters are dedicated to the European commercial airplanes that marked their era: Caravelle, Concorde, Airbus A320, and Airbus A380. The final chapter deals with the flight controls of the Boeing V-22 and AgustaWestland AW609 tiltrotor aircraft. These address concerns that also apply to electromechanical actuators which should be fitted on more electrical aircraft in the future. The topics covered in this series of books constitute a significant source of information for individuals and engineers from a variety of disciplines seeking to learn more about aerospace actuation systems and components.

Aerospace Actuators 2 Jean-Charles Maré, 2017-03-13 This book is the second in a series of volumes which cover the topic of aerospace actuators following a systems-based approach. This second volume brings an original functional and architectural vision to more electric aerospace actuators. The aspects of signal, Signal by Wire, and power, Power by Wire, are treated from the point of view of needs, their evolution throughout history, and operational solutions that are in service or in development. This volume is based on an extensive bibliography, numerous supporting examples, and orders of magnitude which refer to flight controls and landing gear for various aircraft, fixed or rotorwing launchers, in commercial, private, and military applications. The topics covered in this set of books constitute a significant source of information for individuals and engineers from a variety of disciplines seeking to learn more about aerospace actuation systems and components.
