Lepawsky,2018-04-13 An examination of the global trade and traffic in discarded electronics that reframes the question of the right thing to do with e waste The prevailing storyline about the problem of electronic waste frames e waste as generated by consumers in developed countries and dumped on people and places in developing countries In Reassembling Rubbish Josh Lepawsky offers a different view In an innovative analysis of the global trade and traffic in discarded electronics Lepawsky reframes the question of the right thing to do with e waste mapping the complex flows of electronic materials He counters the assumption that e waste is a post consumer problem pointing out that waste occurs at all stages of electronic materials existence and calls attention to the under researched world of reuse and repair Lepawsky explains that there are conflicting legal distinctions between electronic waste and non waste and examines a legal case that illustrates the consequences He shows that patterns of trade do not support the dominant narrative of e waste dumping but rather represent the dynamic ecologies of repair refurbishment and materials recovery He asks how we know waste how we measure it and how we construe it and how this affects our efforts to mitigate it We might not put so much faith in household recycling if we counted the more massive amounts of pre consumer electronic waste as official e waste Lepawsky charts the minescapes productionscapes and clickscapes of electronics and the uneven discardscapes they produce Finally he considers both conventional and unconventional e waste solutions including decriminalizing export for reuse repair and upgrade enabling ethical trade in electronics reuse repair refurbishment and recycling implementing extended producer responsibility and instituting robust forms of public oversight **Lose It For Life** Stephen Arterburn,2007-08-05 Study Guide and

environmental problems we are now facing Nothing could be further from the truth This guide will show how we've been misled to believe this narrative in order to protect corporate profits and how changing our disposable habits and fighting misinformation is the best thing we can do to beat climate change Corporations have lied to keep us buying their products and distracted from the fact that waste and emissions are caused by how they do business Single use plastics are a big money maker for the fossil fuel industry They created the triangle symbol to make us think plastics will recycle even though that can't easily be done Manufacturers choose not to invest in recycled packaging and materials Virgin materials mined from Earth are cheaper and often subsidized Technology exists to eliminate most of the greenhouse gas emissions they cause It's time to fight for the truth and take matters into our own hands What we buy and how it's made affects how well reuse and recycle works Using the power of our voices and wallets we can make corporations change how they do business They answer to us the people who buy their products and invest in their stock We can insist they take responsibility for the damage they cause We have the power to fight climate change at home and in our cities I don't know about you but I'm not ready to leave the health and well being of my family in the hands of people who I hope will figure this mess out We all need to change for the better of our planet and our lives There are alternatives to buying disposable goods and packaging Buy durable goods and reusable packaging to save money and the planet Reduce and reuse packaging First eliminate plastic shopping bags We can do things differently to change our eating and buying habits A lot of trash comes with convenience dining like packaged and fast foods Buying used products reduces wasted energy materials and water It's time we use our buying power and our votes to change for the better Waste of anything food energy goods needs to be eliminated Elect representatives who put people before corporations Your voice can create change Check out HowExpert Guide to Recycling to learn how to recycle eliminate disposables reduce waste pollution conserve resources save energy and protect the environment About the Author Jen Thilman has been a recycling and zero waste volunteer for decades which is how she learned that recycling doesn't always work She has spent years working in green energy technology and studies sustainable living while she strives for it in her own life Jen completed training from the Climate Reality Project in June of 2022 Marrying her love for writing and the environment Jen writes blogs about how to buy sustainable products recycle everyday items and save the planet Jen lives with her wirehaired terrier Teddy Bear in the San Francisco Bay Area She writes non fiction and fiction in many genres and formats from short stories to poetry as well as novels that include a post climate apocalypse dystopian series HowExpert publishes how to guides on all topics from A to Z by everyday experts [War College](#) Mark Donahue, 2024-08-28 It's 1964 you're a high school junior and the Beatles just came to town Getting your legs blown off by a mine in a jungle 8 000 miles away isn't something you worry about Basketball making out with your girlfriend and drinking beer on Friday nights are your real priorities But then you hear of a kid who got shot and died over there Then more guys from the next town Then your former best friend All blown to hell All really dead A war in a place you'd never heard of only

months before is getting closer But eighteen year old Jon Taylor living the good life in San Diego isn't worried He has a plan He's gotten an appointment to the Naval Academy After graduation he'll serve his five years get his MFA from Yale then pursue a writing career that will make him rich and famous Enter the Vietnam War a duplicitous girlfriend revoked Naval Academy appointment low draft number and Jon's plans are destroyed Like many of his friends War College follows the lives of six young men who come to Hiram Scott College in 1965 None of them ever dreamed they'd spend their freshman year in Scottsbluff Nebraska at a college no one had ever heard of But it's better than a Vietnam jungle Maybe With poignancy humor music and a story of fifty year friendships author Mark Donahue weaves a nostalgic tale that could only be told by someone who was there As the title suggests War College like the Vietnam War is complicated A story steeped in historical fact shining a light on both the horrors of war and the joys of youth
