Gourmet Lab Sarah Reeves Young, 2011 Hands on inquiry based and relevant to every student's life. *Gourmet Lab* serves up a full menu of activities for science teachers of grades 6-12. This collection of 15 hands on experiments each of which includes a full set of both student and teacher pages challenges students to take on the role of scientist and chef as they boil, bake and toast their way to better understanding of science concepts from chemistry, biology and physics. By cooking edible items such as pancakes and butterscotch, students have the opportunity to learn about physical changes in states of matter, acids and bases, biochemistry and molecular structure. The Teacher pages include Standards addressed in each lab, a vocabulary list, safety protocols, materials required, procedures, data analysis, student questions, answer key and conclusions and connections to spur wrap up class discussions. Cross curricular notes are also included to highlight the lesson's connection to subjects such as math and literacy. Finally, optional extensions for both middle school and high school levels detail how to explore each concept further. What better topic than food to engage students to explore science in the natural world.

Glencoe Earth Science Ralph M. Feather, 1999 Earth science is the study of Earth and space. It is the study of such things as the transfer of energy in Earth's atmosphere, the evolution of landforms, patterns of change that cause weather, the scale and structure of stars and the interactions that occur among the water, atmosphere and land. Earth science in this book is divided into four specific areas of study: geology, meteorology, astronomy and oceanography. p. 8-9
