Nehrig,2013 The purpose of this study was to compare achievement results of students enrolled in traditional and virtual Algebra 1 courses in the School District of Volusia County Florida and to identify which educational interventions are utilized by traditional and online teachers to promote student success especially for at risk populations Two research questions guided this study This study is significant as school districts expand virtual options for K 12 students to meet legislative mandates and student demand while also exploring and developing methods to ensure student success Student scores on the Florida Algebra 1 End of Course Exam EOC were compared to determine what difference if any existed in the performance of students in traditional face to face classrooms and virtual settings Surveys were also distributed to traditional brick and mortar and virtual teachers to identify which educational interventions were provided to at risk students and to measure teacher perception of the relative effectiveness of those interventions in each setting One sample t test results indicated a statistically significant difference in the mean scale scores of traditional and virtual students on the Florida Algebra 1 EOC

Survey responses indicated little variation in the interventions provided by teachers to at risk students in each setting Low effectiveness ratings for interventions in the Resources category such as Mentors from the Community warrant further investigation as these responses run counter to previous research Due to this study s small sample and wide disparity between the number of traditional and virtual students caution is advised in the interpretation of results
