## MODEL PROBLEMS continued

- GOAL** A designer is trying to ensure that levels 1 and 2 are parallel in a gutter. It has a sketching tool to draw the bottom floor angle for level 1.

### Problem

Construct level 1 using a straightedge.

The designer can use a protractor to construct corresponding angles and parallel lines, as well as a compass and straightedge. Use the straightedge to draw a line segment that represents level 1.

Construct an angle using a protractor.

Place the straightedge to the left of level 1 and construct the angle with a protractor. This particular angle is  $120^\circ$ .

Construct a corresponding angle using a protractor.

Place the protractor down, along the straightedge, and measure a corresponding angle of  $120^\circ$ .

Construct level 2 using the corresponding angles previous answer.

Using a straightedge, construct level 2 to the  $120^\circ$  mark on the protractor. Since the corresponding angles are congruent, the levels are parallel.

**DEDUCTIVE GEOMETRY** RAYMOND GUYAMIER,2013-06-26 Deductive Geometry is for students parents and teachers who need practice solving proofs in geometry Specifically where geometry is part of the 4e curriculum in a French program or for American students taking geometry between grades 8 and 10 This book shows step by step how to reason and solve geometry problems by writing solutions in a clear logical and deductive sequence This strategy is called modeling Students learn by imitating the method and eliminating all the non value adding verbiage that are distracting to the grader By showing the core steps required to solve a problem students avoid extraneous text and steps that make the solution difficult to follow and difficult for the grader to evaluate with precision The book should be used as a complement to any geometry textbook It is especially beneficial for average students with difficulties writing the solution to a problem in a logical deductive process I would recommend the user of my book to first try to solve the problems entirely before comparing with the step by step solutions following each chapter      *1-Hour Geometry Review Guide For the End-of-Course, SAT, ACT, and ASSET tests*
