**Mastering GeoServer** Colin Henderson,2014-11-25 If you are a GIS professional who intends to explore advanced techniques and get more out of GeoServer deployment rather than simply delivering good looking maps then this book is for you

**GeoServer Cookbook** Stefano Iacovella,2014-11-27 This book is ideal for GIS experts developers and

system administrators who have had a first glance at GeoServer and who are eager to explore all its features in order to configure professional map servers Basic knowledge of GIS and GeoServer is required *PostGIS Cookbook* Mayra Zurbarán, Thomas Kraft, Stephen Vincent Mather, Bborie Park, Pedro Wightman, 2018-03-28 Create and manage spatial data with PostGIS Key Features Import and export geographic data from the PostGIS database using the available tools Maintain optimize and fine tune spatial data for long term viability Utilize the parallel support functionality that was introduced in PostgreSQL 9.6 Book Description PostGIS is a spatial database that integrates the advanced storage and analysis of vector and raster data and is remarkably flexible and powerful PostGIS provides support for geographic objects to the PostgreSQL object relational database and is currently the most popular open source spatial databases If you want to explore the complete range of PostGIS techniques and expose related extensions then this book is for you This book is a comprehensive guide to PostGIS tools and concepts which are required to manage manipulate and analyze spatial data in PostGIS It covers key spatial data manipulation tasks explaining not only how each task is performed but also why It provides practical guidance allowing you to safely take advantage of the advanced technology in PostGIS in order to simplify your spatial database administration tasks Furthermore you will learn to take advantage of basic and advanced vector raster and routing approaches along with the concepts of data maintenance optimization and performance and will help you to integrate these into a large ecosystem of desktop and web tools By the end you will be armed with all the tools and instructions you need to both manage the spatial database system and make better decisions as your project's requirements evolve What you will learn Import and export geographic data from the PostGIS database using the available tools Structure spatial data using the functionality provided by a combination of PostgreSQL and PostGIS Work with a set of PostGIS functions to perform basic and advanced vector analyses Connect PostGIS with Python Learn to use programming frameworks around PostGIS Maintain optimize and fine tune spatial data for long term viability Explore the 3D capabilities of PostGIS including LiDAR point clouds and point clouds derived from Structure from Motion SfM techniques Distribute 3D models through the Web using the X3D standard Use PostGIS to develop powerful GIS web applications using Open Geospatial Consortium web standards Master PostGIS Raster Who this book is for This book is for developers who need some quick solutions for PostGIS Prior knowledge of PostgreSQL and spatial concepts would be an added advantage [A Research Guide to Cartographic Resources](#) Eva H. Dodsworth, 2018-09-22 The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields A Research Guide to Cartographic Resources navigates the numerous American and Canadian cartographic resources available in print and online offering researchers academics and students with information on how to locate and access the large variety of resources new and old Dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations A Research Guide to Cartographic Resources consists of 18 chapters two appendices and a detailed

index that includes place names and libraries structured in a manner consistent with most reference guides including cartographic categories such as atlases dictionaries gazetteers handbooks maps plans GIS data and other related material Almost all of the resources listed in this guide are categorized by geography down to the county level making efficient work of the type of material required to meet the information needs of those interested in researching place specific cartographic related resources Additionally this guide will help those interested in not only developing a comprehensive collection in these subject areas but get an understanding of what materials are being collected and housed in specific map libraries geospatial centers and their related websites Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level This volume combines the traditional and historical collections of cartography with the modern applications of GIS based maps and geospatial datasets

**ArcGIS for Desktop Cookbook** Daniela Cristiana Docan, 2015-01-22 This book is a good companion to get you quickly acquainted with everything you need to increase your productivity with the ArcGIS Desktop It would be helpful to have a bit of familiarity with basic GIS concepts If you have no previous experience with ArcGIS this book will still be helpful for you because it will help you catch up to the acquainted users from a practical point of view

Geocomputation Chris Brunsdon, Alex Singleton, 2015-01-22 Geocomputation is the use of software and computing power to solve complex spatial problems It is gaining increasing importance in the era of the big data revolution of smart cities of crowdsourced data and of associated applications for viewing and managing data geographically like Google Maps This student focused book Provides a selection of practical examples of geocomputational techniques and hot topics written by world leading practitioners Integrates supporting materials in each chapter such as code and data enabling readers to work through the examples themselves Chapters provide highly applied and practical discussions of Visualisation and exploratory spatial data analysis Space time modelling Spatial algorithms Spatial regression and statistics Enabling interactions through the use of neogeography All chapters are uniform in design and each includes an introduction case studies conclusions drawing together the generalities of the introduction and specific findings from the case study application and guidance for further reading This accessible text has been specifically designed for those readers who are new to Geocomputation as an area of research showing how complex real world problems can be solved through the integration of technology data and geocomputational methods This is the applied primer for Geocomputation in the social sciences

*Mapping, Monitoring, and Modeling Land and Water Resources* Pravat Kumar Shit, Pulakesh Das, Gouri Sankar Bhunia, Dipanwita Dutta, 2021-06-27 The wide range of challenges in studying Earth system dynamics due to uncertainties in climate change and complex interference from human activities is creating difficulties in managing land and water resources and ensuring their sustainable use Mapping Monitoring and Modeling Land and Water Resources brings together real world case studies accurately surveyed and assessed through spatial modeling The book focuses on the effectiveness of combining remote sensing geographic information systems and R

The use of open source software for different spatial modeling cases in various fields along with the use of remote sensing and geographic information systems will aid researchers students and practitioners to understand better the phenomena and the predictions by future analyses for problem solving and decision making *Geographical Information Systems Theory, Applications and Management* Cédric Grueau,Armanda Rodrigues,Lemonia Ragia,2024-04-30 This book constitutes the refereed post proceedings of the 9th International Conference on Geographical Information Systems Theory Applications and Management GISTAM 2023 held in Prague Czech Republic during April 25 27 2023 The 6 full papers included in this book were carefully reviewed and selected from 37 submissions They focus on challenges in geo spatial data sensing observation representation processing visualization sharing and managing in all aspects concerning both information communication and technologies ICT as well as management information systems and knowledge based systems Geospatial Intelligence: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2019-03-01 Decision makers such as government officials need to better understand human activity in order to make informed decisions With the ability to measure and explore geographic space through the use of geospatial intelligence data sources including imagery and mapping data they are better able to measure factors affecting the human population As a broad field of study geospatial research has applications in a variety of fields including military science environmental science civil engineering and space exploration Geospatial Intelligence Concepts Methodologies Tools and Applications explores multidisciplinary applications of geographic information systems to describe assess and visually depict physical features and to gather data information and knowledge regarding human activity Highlighting a range of topics such as geovisualization spatial analysis and landscape mapping this multi volume book is ideally designed for data scientists engineers government agencies researchers and graduate level students in GIS programs **Advanced Intelligent Systems for Sustainable Development (AI2SD'2018)** Mostafa Ezziyyani,2019-02-13 This book gathers papers presented at the International Conference on Advanced Intelligent Systems for Sustainable Development AI2SD 2018 which was held in Tangiers Morocco on 12 14 July 2018 It highlights how advanced intelligent systems have successfully been used to develop tools and techniques for modeling prediction and decision support in connection with the environment Though chiefly intended for researchers and practitioners in advanced intelligent systems for sustainable development the book will also be of interest to those working in environment and the Internet of Things environment and big data analysis summarization prediction remote sensing geo information geophysics marine and coastal environments and sensor networks for environment services *Emerging Trends in Open Source Geographic Information Systems* Srivastava, Naveenchandra N.,2018-05-25 Open access to information of geographic places and spatial relationships provides an essential part of the analytical processing of spatial data Access to connected geospatial programs allows for improvement in teaching and understanding science technology engineering and mathematics Emerging Trends in Open Source Geographic Information Systems provides emerging research on the applications of free and open

software in geographic information systems in various fields of study While highlighting topics such as data warehousing hydrological modeling and software packages this publication explores the assessment and techniques of open software functionality and interfaces This book is an important resource for professionals researchers academicians and students seeking current research on the different types and uses of data and data analysis in geographic information systems

**Soil Organic Carbon Mapping Cookbook** Food and Agriculture Organization of the United Nations, Global Soil Partnership, 2018-05-21 The Soil Organic Carbon Mapping cookbook provides a step by step guidance for developing 1 km grids for soil carbon stocks It includes the preparation of local soil data the compilation and pre processing of ancillary spatial data sets upscaling methodologies and uncertainty assessments Guidance is mainly specific to soil carbon data but also contains many generic sections on soil grid development as it is relevant for other soil properties This second edition of the cookbook provides generic methodologies and technical steps to produce SOC maps and has been updated with knowledge and practical experiences gained during the implementation process of GSOCmap V1.0 throughout 2017 Guidance is mainly specific to SOC data but as this cookbook contains generic sections on soil grid development it can be applicable to map various soil properties

**New Trends in Computational Vision and Bio-inspired Computing** S. Smys, Abdullah M. Ilyasu, Robert Bestak, Fuqian Shi, 2020-09-27 This volume gathers selected peer reviewed original contributions presented at the International Conference on Computational Vision and Bio inspired Computing ICCVBIC conference which was held in Coimbatore India on November 29-30 2018 The works included here offer a rich and diverse sampling of recent developments in the fields of Computational Vision Fuzzy Image Processing and Bio inspired Computing The topics covered include computer vision cryptography and digital privacy machine learning and artificial neural networks genetic algorithms and computational intelligence the Internet of Things and biometric systems to name but a few The applications discussed range from security healthcare and epidemic control to urban computing agriculture and robotics In this book researchers graduate students and professionals will find innovative solutions to real world problems in industry and society as a whole together with inspirations for further research
