

## Adult Preventive Care Guidelines

### About the MHQP Adult Preventive Care Guidelines

MHQP's 2023 guidelines were developed by a collaborative group of Massachusetts healthcare organizations. These are recommendations for providing preventive care to adult patients from the general population. These guidelines should not supplant clinical judgment or the needs of individual patients. These guidelines are intended as quality-practice recommendations and are not intended as a description of benefits, conditions of payment, or any other legal requirements of any particular health plan or payor. Each health plan or payor makes its own determination of coverage and benefits. In the event that these practice recommendations are inconsistent with any applicable laws or regulations, such laws or regulations take precedence.

### Social Determinants of Health (SDoH)

- Review a completed [SDoH screening tool](#) and incorporate into the plan of care
- Develop [action plan](#) at each visit with information available
  - Make sure that social determinants that are being targeted for recommendations are modifiable, like food insecurity, homelessness, lack of transportation, or inaccessibility to quality education
  - Individuals who are at high-risk of certain conditions due to unmodifiable social determinants, like race or age, should be subject to increased screenings as indicated
- Refer patients to additional team members for education, resources, and referrals as needed
- Discuss access to healthcare by asking: "Do you have any concerns that prevent you from keeping your health care appointments?"
- Assess health literacy by asking: "How confident are you filling out medical forms by yourself?"

#### Screening Tools and Action Plans:

[Social Needs Screening Tool](#): The Social Needs Screening tool screens for five core health-related social needs, which include housing, food, transportation, utilities, and personal safety, using validated screening questions, as well as the additional needs of employment, education, child care, and financial strain.

[Develop an Action Plan](#): A quick form to guide a discussion with patients about their social determinants of health and document a plan to address them. The form is available in seven languages.

#### Community Resources:

[2-1-1](#): This resource helps individuals obtain information about receiving assistance in the event of a crisis, emergency, or natural disaster.

[Find Help](#): This interactive tool helps individuals find free or reduced cost services related to food, housing, or transportation.

[HelpSteps](#): This interactive tool provides information on how to access social services related to food, housing, and medical care.

#### DEFINITION OF THE SOCIAL DETERMINANTS OF HEALTH FOR MHQP'S GUIDELINES PROGRAM

Social Determinants of Health (SDoH) are the conditions under which people are born, grow, live, work, and age. SDoH can either help a patient's health (like living in a low crime neighborhood), or adversely affect it (such as living in a neighborhood with poor air quality and pollutants). Conditions can be modifiable, like food insecurity or homelessness, or unmodifiable, like race or age. ([AAP](#), [WHO](#))

Monitoring HIV Care in the United States Institute of Medicine, Board on Population Health and Public Health Practice, Committee to Review Data Systems for Monitoring HIV Care, 2012-08-13 The number of people living with HIV/AIDS in the United States is growing each year largely due both to advances in treatment that allow HIV-infected individuals to live longer and healthier lives and due to a steady number of new HIV infections each year. The U.S. Centers for Disease Control and Prevention (CDC) estimates that there were 1.2 million people living with HIV infection in the United States at the end of 2008, the most recent year for which national prevalence data are available. Each year approximately 16,000 individuals die from AIDS despite overall improvements in survival and 50,000 individuals become newly infected with HIV. In 2011, the CDC estimated that about three in four people living with diagnosed HIV infection are linked to care within 3 to 4 months of diagnosis and that only half are retained in ongoing care. In the context of the continuing challenges posed by HIV, the White House Office of National AIDS Policy (ONAP) released a National HIV/AIDS Strategy (NHAS) for the United States in July 2010. The primary goals of the NHAS are to reduce HIV incidence, increase access to care, and optimize health outcomes and reduce HIV-related health disparities. Monitoring HIV Care in the United States addresses existing gaps in the collection, analysis, and integration of data on the care and treatment experiences of PLWHA. This report identifies critical data and indicators related to continuous HIV care and access to supportive services, assesses the impact of the NHAS and the ACA on improvements in HIV care, and identifies public and private data systems that capture the data needed to estimate these indicators. In addition, this report addresses a series of specific questions related to the collection, analysis, and dissemination of such data. Monitoring HIV Care in the United States is the first of two reports to be prepared by this study. In a forthcoming report also requested by ONAP, the committee will address the broad question of how to obtain national estimates that characterize the health care of people living with HIV in the United States. The second report will include discussion of challenges and best practices from previous large-scale and nationally representative studies of PLWHA, as well as other populations. *Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2013: Budget hearing for HHS: Secretary; budget hearing for HHS: NIH* United States.
