In high school, did it ever feel like the overall education was prolongedly tedious and uninteresting? An increasing number of schools in our modern day society graduate students who have no interest in pursuing further education or have barely scraped by with just-above-failing grades.

The current state of our nation's schooling leaves an abundance of room for adjustment and improvement; if the material is engaging enough, students will be more motivated to complete the tasks they are given. Increased fundraising can provide numerous benefits to any school that actively participates in their community and monitors their funds and where they use them. By being held accountable, both the school and any participating parties will gain credibility in front of the donors and the surrounding community.

The result is hundreds of unmotivated kids dropping out before their high school graduation. As of May 2018, Idaho's graduation rate stood at a staggering 77.2% (Boyington), which means that 32.8 % of Idaho's high school students were not educationally stimulated enough to stay.

A variety of teaching methods are changing the course of the future of education, and schools across the nation should tak
