

Themes	My Community and Me (September-November)	The Environment and Me (December-March)	Change and Growth All Around Me (April-June)
Unit Topics	Welcome to Pre-K 5 Senses All About Us	Where We Live Transportation Light Water	Plants Babies Transformation
Kindergarten Alignment	These pre-K studies will provide important foundational knowledge for students and support their growing understanding of self and the world around them.		
	This pre-K theme occurs simultaneously to the Kindergarten (K) social studies unit on School and Community . It will introduce children to the practices of studying themselves and others, which lay the foundation for the Kindergarten unit Self and Others . In this theme, children begin seeing themselves as critical thinkers and observers of the environment and people around them, practicing key science skills that they will use in future pre-K and Kindergarten science-based units.	This pre-K theme will add depth to children's study of themselves which aligns with the Kindergarten social studies unit of Self and Others . Additionally, children will experience content that supports the K unit Geography, People and the Environment . Science content aligns to the K unit on light and water (Trees Through the Seasons as well as Exploring Properties).	In studying Plants and Babies, pre-K students will continue to learn about the physical environment (aligns to the K social studies unit Geography, People and the Environment as well as the Science unit on Exploring Properties). The study of transformation supports important concepts that are addressed while studying change in K (social studies unit Families, Change and Time). Also science content aligns to K units on plants and the environment (Trees Through the Seasons) and living things (Animals).

Education George Graham, Eloise Elliott, Steve Palmer, 2016-06-03 It's never been more challenging to teach physical education to children and adolescents. Between managing difficult behavior and adapting lessons for students with diverse needs, teachers have their hands full. *Teaching Children and Adolescents Physical Education: Becoming a Master Teacher* has been helping both new and experienced physical educators meet these challenges for many years, and this revised edition has been updated to address many of the new challenges that have emerged in the past decade. Expanded to address teaching across elementary, middle, and high school, this classic resource demonstrates the techniques and skills master teachers rely on. Many of these skills are illustrated with videotapes of actual K-12 teachers in action. This already successful text goes beyond pedagogy to include concrete curriculum strategies for making classes vibrant, fun, and developmentally appropriate. Written in conversational language, the book is readily applicable. *Teaching Children and Adolescents Physical Education* has been refreshed to be more valuable than ever to veteran and future physical educators navigating the elementary, middle, and high school environment. New features include the following: New research and examples from the world of secondary physical education; Technology tips and app ideas contributed by real physical educators; Linked directly to national standards and grade-level outcomes; SHAPE America 2014, a new approach to planning and teaching lessons to meet the needs of all students; Many sample task sheets and assessment examples for middle and high school; In addition, this resource features three new chapters that add even more depth to the topics covered. The chapters address long-term planning, writing and teaching the lesson plan. The value of this book can be attributed to the authors' years of experience teaching physical education in elementary, middle, and high school. George Graham, Eloise Elliott, and Steve Palmer understand all aspects of quality physical education and the teaching challenges that come with the territory because they have been there. Emphasizing real-world strategies, the authors weave instructional scenarios throughout the book. Readers will see in action the decision-making process master teachers go through when writing and teaching lesson plans. Because every class is different, this resource also highlights how to plan for diverse students and how to adjust lessons accordingly. The text is packed with tried-and-true advice for motivating students to practice, building positive feelings, observing and analyzing, providing feedback, and assessing students through formative assessment. Examples show what effective physical education instruction really looks like in secondary gymnasiums and on playgrounds. Rich with firsthand advice and insight, this book will guide educators toward becoming master teachers of physical education.

Enabling Students in Mathematics Gordon Marshall, 2015-11-18 This book addresses the cognitive, social, and psychological dimensions that shape students' mathematics experience to help students become more capable, cooperative, and confident in the process of engaging mathematics. In these ways, they can have a more valuable and enjoyable mathematics experience and become more valued participants in society. The book focuses on the mathematics classroom for students grades six to twelve and how students can become more successful mathematical thinkers in addition to how the curriculum could be presented so as to provide a more engaging
