illness and neurodiversity This book explores and promotes holistic salutogenic and preventive strategies that recognise and respond to people's needs, wants, wishes and rights to further health, wellbeing and equality. Bringing together years of experience as designers and clinicians, the contributors to the book emphasise how design can be a collaborative creative process as well as an outcome of this process, and they reveal how this is guided by mental health and design policy. Through its three parts, the book explores themes of ethics, citizenship and power relationships in co-design, providing an overview of current developments and approaches in co-design of the culturally and value-sensitive adaptation of design interventions and their applications, many of which are a result of co-design and of policy and related standards in and for design and mental health. In this way, the book demonstrates how design can help to support people, their care partners and care professionals in promoting mental health and wellbeing, and it offers a rich resource on how to create a sustainable future for care in this domain. The book provides a unique and holistic overview and resource for designers, researchers, students, policy providers and health and care professionals to help support the development and adoption of person-centred design processes and interventions.

Ciottone's Disaster Medicine - E-Book

Gregory R. Ciottone, 2023-03-07 While medical specialists in disaster mitigation, preparedness and response are needed worldwide, the initial phase of disaster response is almost entirely dependent upon local resources, making it essential that all healthcare personnel have a working knowledge of the field and stand ready to integrate into the response system. Ciottone's Disaster Medicine, 3rd Edition, is the most comprehensive reference available to help accomplish these goals in every community. It thoroughly covers isolated domestic events as well as global disasters and humanitarian crises. Dr Gregory Ciottone and more than 200 worldwide authorities share their knowledge and expertise on the preparation, assessment and management of both natural and man-made disasters, including lessons learned by the responders to contemporary disasters such as the COVID-19 pandemic, Australian and western U.S. wildfires, European heatwaves, the Beirut explosion, recent hurricanes and typhoons, and the global refugee crisis. Part 1 offers an A to Z resource for every aspect of disaster medicine and management, while Part 2 features an exhaustive compilation of every conceivable disaster event organized to facilitate quick reference in a real-time setting. Covers basic concepts such as identification of risks, organizational preparedness, equipment planning, disaster education and training, and more advanced concepts such as disaster risk reduction, health in complex emergencies, building local disaster resiliency, psychological impact of disasters on children, and more. Contains new decision trees throughout that help guide you through the decision-making process in difficult situations. Uses an easy-to-follow templated approach to historical perspectives, overviews of current practice, including pre-incident and post-incident actions, medical treatment of casualties and potential pitfalls. Includes updated sections on man-made disasters, including mass casualties, active shooter situations, integrated response to terrorist attacks, and chemical, biological, radiological, nuclear, high-yield explosives disasters. Discusses the latest technologies such as the use of mobile disaster applications, drone
