

Honeywell

Honeywell Model 700/800 Signal Processor and Viewing Head

TECHNICAL CATALOG

- Model 700ACSP Universal 85–265 VAC powered, plus 24VDC backup.
- Model 700DCSP 22–26VDC powered, plus 24VDC backup.

The two Model 700 signal processors are similar, with 12 push-buttons, a two-digit numeric display, and four LED status indicators for operator interface. The only difference between the two is that one accepts AC power and the other accepts DC power. Both models also accept 24VDC backup power. Most of the signal processor connections are made through Phoenix plug-in connectors. Communication connections are made through modular phone jacks located at the top of the signal processors (Fig. 9).

Both signal processor models mount on a standard 35 mm DIN rail. They snap into place and may be released from the rail using a flat screwdriver.

There are two types of viewing heads—IR/flicker-sensitive and UV-sensitive—with various features offered resulting in ten different models. See Table 1 on page 2 for details.

The S702 and S706 viewing head housings are larger in diameter than the S80X series, are made of aluminum, and are secured with over-center latches to their mounting blocks (Fig. 10). In contrast, the S802 and S806 viewing head housings are smaller in diameter and are made of stainless steel (Fig. 11). An 800 series viewing head is secured in its mounting block by a friction twist-lock.

The IR/flicker sensitive viewing heads have a high-pass filter that passes flicker frequencies above 33 Hz. The UV models respond to the level of UV radiation—not UV flicker—so there is no filter option.

APPLICATION

The Honeywell Model 700ACSP and Model 700DCSP signal processors are single-channel, fail safe, flame monitoring systems when used in conjunction with the S70X/S80X viewing heads. They offer easy setup, excellent discrimination, and high reliability.

FEATURES

Viewing heads are interchangeable between the two signal processor models. Any viewing head in the two families will work with any of the signal processors.

Two signal processor models are available:
