(Group 1) How do Washington's two communities develop differently over time?

(On May 28, 1999, Mount St. Helens in the state of Washington erupted with the force of a hydrogen bomb. The volcano had been dormant for over 124 years, but more 17 people were dead and forests and lakes were totally destroyed, including nearby Spirit Lake, which became a dead lake. The local Washingtonian community is about 20 miles from the volcano and only slightly affected like in the immediate aftermath, which means, especially from local lakes (which Washingtonian depend on) disappear in the area, and there are things that are lost, many areas of the community are destroyed with a large variety of good and good life, there are no other areas from a place.
