Pronghorn Bart W. O'Gara, James D. Yoakum, 2004 One of the fastest land animals on Earth, second only to the cheetah, the pronghorn can reach speeds of more than 50 miles per hour. It also is one of the most fascinating of all animals. For many people, the pronghorn was nearly as much a symbol of the American West as was the bison. For some, it still is. Eliminated from much of its historic range by the early 1900s, this unique North American big game species has experienced a remarkable recovery and now is found throughout the western United States, Canada, and northern Mexico. **Thirty Years in the Making: Pronghorn Ecology and Management** contains the most comprehensive information on the behavior, physiology, migration, taxonomy, and management of this extraordinary animal. Full chapters are devoted to distribution, nutrition, and food diseases and parasites, ecosystem management, hunting, and much more. The principal authors, the world's preeminent pronghorn biologists, Bart W. O'Gara and Jim D. Yoakum, conclude with a thorough discussion of the future of pronghorn and their management. With 23 chapters that include contributions by 10 other wildlife professionals and more than 850 illustrations, including original artwork by Edson Fichter and Daniel P. Metz, **Pronghorn Ecology and Management** is the definitive work on the species. **A Wildlife Management Institute Book**
