Studies on the Teaching of Asian Languages in the 21st Century Hüseyin İçen, Seniye Vural, 2014-03-26 In recent years there has been an increasing demand for and rapid development in the learning and teaching of Asian languages as a foreign language throughout the world. Many governments recognize that Asian languages are of strategic economic importance and thus they are now offered as a foreign language by a great number of schools and higher education institutions. This book contains chapters written by different authors from several countries on key issues and problems in the teaching of the Chinese, Russian, Farsi, Japanese and Malaysian languages and some comparative studies. The contributors here explore future directions in the teaching of Asian languages in the 21st century. The ten chapters of the book have been prepared by the authors using the scholarly papers they presented at the Second International Symposium on Asian Languages and Literatures ADES which was held on 3-4 May 2012 at Erciyes University, Kayseri, Turkey, under the title of Teaching of Asian Languages in the 21st Century.

MasterClass in History Education Christine Counsell, Katharine Burn, Arthur Chapman, 2016-10-06 MasterClass in History Education draws on international research and practice to present effective and engaging approaches for history teachers who want to explore the ways in which reading research and reflection can support the development of history teaching and learning in the classroom. At the heart of the book is a series of professional enquiries carried out by experienced history teachers working in a range of contexts. Each history teacher addresses clear questions arising from their practice and together they illustrate various approaches to data collection, data analysis and argument. These history teachers also show how they drew on diverse scholarship in history and history education including many publications by other history teachers. In eight further chapters, other experts ranging from practitioner scholars to researchers in diverse fields such as history, history education, teacher education, teacher research and curriculum theory reflect on the distinctive insights that these teachers offer and explore connections with their own fields. The combination of perspectives and the depth of knowledge of the varied contributors reveal the importance of different kinds of relationship between theory and practice. The links between classroom realities and research and the critical use of different kinds of text will support history teachers in developing their practice and professional voice.
