**Disorder and the Disinformation Society** Jonathan Paul Marshall, James Goodman, Didar Zowghi, Francesca da Rimini, 2015-04-17 This book is the first general social analysis that seriously considers the daily experience of information disruption and software failure within contemporary Western society Through an investigation of informationalism defined as a contemporary form of capitalism it describes the social processes producing informational disorder While most social theory sees disorder as secondary pathological or uninteresting this book takes disordering processes as central to social life The book engages with theories of information society which privilege information order offering a strong counterpoint centred on disinformation Disorder and the Disinformation Society offers a practical agenda arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism It outlines the dynamics of software failure as they impinge on of information workers and on daily life explores why computerized finance has become inherently self disruptive asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship and reveals how social media can extend but also distort the development of social movements

Offshore Mechatronics Systems Engineering Hamid Reza Karimi, 2018-07-04 The book gives a systematical and almost self contained description of the many facets of envisaging designing implementing or experimentally exploring offshore mechatronics and systems along the adequate designs of integrated modeling safety control and supervision infrastructure With the rapid improvements in offshore technologies in various fields such as oil and gas industry wind energy robotics and logistics many researchers in academia and industry have focused on technology based challenges raised in offshore environment This book introduces novel theoretical or practical techniques for offshore mechatronics systems Chapters cover general application model based systems engineering wind energy control systems mechanics health monitoring safety critical human machine systems logistics and offshore industrial complexes such as oil and gas operations robotics large space structures and autonomous underwater vehicles and some other advanced technologies The core feature of this book is that of establishing synergies of modeling control computing and mechanics in order to achieve not only robust plant system operation but also properties such as safety cost integrity and survivability while retaining desired performance quality The book provides innovative insights into applications aspects and theoretical understanding of complex offshore mechatronics systems that has emerged in recent years either via physical implementations or via extensive computer simulations in addition to sound innovated theoretical developments It will serve as a reference for graduate and postgraduate students and for researchers in all engineering disciplines including mechanical engineering electrical engineering and applied mathematics to explore the

state of the art techniques for solving problems of integrated modeling control and supervision of complex offshore plants with collective safety and robustness Thus it shall be useful as a guidance for system engineering practitioners and system theoretic researchers alike

**The Sirens of Mars** Sarah Stewart Johnson, 2020 Mars was once similar to Earth but today there are no rivers no lakes no oceans Yet multiple spacecraft are circling Mars sweeping over Terra Sabaea Syrtis Major the dunes of Elysium and Mare Sirenum on the brink perhaps of a staggering find Johnson tells the story of how she and other researchers have scoured Mars for signs of life She interlaces her journey as a female scientist with tales of other seekers to offer an unlikely natural history of a place where no human has ever set foot while providing a vivid portrait of our quest to defy our isolation in the cosmos adapted from jacket

**An Assessment of the Prospects for Inertial Fusion Energy** National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Board on Physics and Astronomy, Committee on the Prospects for Inertial Confinement Fusion Energy Systems, 2013-08-05 The potential for using fusion energy to produce commercial electric power was first explored in the 1950s Harnessing fusion energy offers the prospect of a nearly carbon free energy source with a virtually unlimited supply of fuel Unlike nuclear fission plants appropriately designed fusion power plants would not produce the large amounts of high level nuclear waste that requires long term disposal Due to these prospects many nations have initiated research and development R compares the various technical approaches to IFE and identifies the scientific and engineering challenges associated with developing inertial confinement fusion ICF in particular as an energy source It also provides guidance on an R D roadmap at the conceptual level for a national program focusing on the design and construction of an inertial fusion energy demonstration plant

**Where Have All the Democrats Gone?** Ruy Teixeira, John B. Judis, 2023-11-07 A Wall Street Journal Best Political Book of 2023 A much needed wake up call for the Democrats which reveals how the party has lost sight of its core principles and endangered its political future from the authors of one of the most influential political books of the 21st century The New York Times For decades American politics has been plagued by a breakdown between the Democratic and Republican parties in which victory has inevitably led to defeat and vice versa Both parties have lost sight of the people at the center of the American electorate leading to polarization and paralysis In Where Have All the Democrats Gone John B Judis and Ruy Teixeira reveal the tectonic changes shaping the country's current political landscape that both pundits and political scientists have missed The Democratic Party once the preserve of small towns as well as big cities and of the industrial working class and the newly immigrated has abandoned and even actively alienated many of these voters In this clarion call and essential argument for common sense and common ground Judis and Teixeira reveal the transformation of American politics and provide a razor sharp critique of where the Democrats have gone awry and how they can avoid political disaster in the days ahead

**Leave It in the Ground** John C. Berg, 2019-09-03 Employing scientific explanations and hard data this book shows why coal is such a problem how the pro coal forces got to be so powerful and how those forces

might be defeated through political activism Coal provided the energy to build modern civilization This energy source raised standards of living multiplied the earth's population and enabled people in developed countries to enjoy leisure time Today we know that if we burn all the coal available climate change will continue to increase But the use of coal isn't purely an environmental issue political and economic forces are also at play This book examines the politics and environmental impact of coal production and distribution presenting a clear point of view that we must shift away from coal use backed by hard data and supplying specific prescriptions for opposing and regulating the coal industry John C Berg explains how ending the burning of coal and of oil and natural gas is a political problem rather than a technical one explodes the clean coal myth providing scientific documentation of how burning coal emits more greenhouse gases per unit of energy than any other fuel and describes how controlling coal use in the United States will also restore the possibility of a meaningful international climate agreement Additionally readers will understand the critical importance of activism from local to international in spurring government regulation to control the coal industry which can only be defeated politically

Weld, Johan De Kleer, 2013-09-17 Readings in Qualitative Reasoning about Physical Systems describes the automated reasoning about the physical world using qualitative representations This text is divided into nine chapters each focusing on some aspect of qualitative physics The first chapter deal with qualitative physics which is concerned with representing and reasoning about the physical world The goal of qualitative physics is to capture both the commonsense knowledge of the person on the street and the tacit knowledge underlying the quantitative knowledge used by engineers and scientists The succeeding chapter discusses the qualitative calculus and its role in constructing an environment that includes behavior over both mythical time and elapsed time These topics are followed by reviews of the mathematical aspects of qualitative reasoning history based simulation and temporal reasoning as well as the intelligence in scientific computing The final chapters are devoted to automated modeling for qualitative reasoning and causal explanations of behavior These chapters also examine the qualitative kinematics of reasoning about shape and space This book will prove useful to psychologists and psychiatrists

### **Open Science in Africa**

Katie Wilson, Rania Mohamed Hassan Baleela, Heila Pienaar, Martie Van Deventer, Dale Peters, 2023-08-30 There is an ongoing transition in the research enterprise towards Open Science OS increasing transparency in researchers collaboration knowledge exchange and how science is organized The Open Access OA movement can be seen as a case study of the challenges that this transition can present For example despite all the advantages of OA and the fact that the concept is exceptionally strong as a principle it is yet to be implemented across all institutions particularly in Africa Even though research productivity from the African continent has increased over the last two decades the global north still dominates the scholarly communication and publication sphere High article processing charges APCs can make it difficult for some African researchers to publish in highly rated and respected academic journals which are critical to their career advancement Fee

waivers and discounts are available but eligibility and percentages vary by publisher and predatory publishing presents a challenge to African researchers In addition the exclusion of many African publication sources from the major bibliographic databases such as Scopus and the Web of Science skews and limits bibliometric analysis and influences the outcomes of world university rankings This Research Topic aims to investigate the transition to OS in the African continent This will include researchers and other stakeholders support services policy makers concerns regarding OS as well as the advantages it offers them Moreover the role of new technologies is also of interest in the implementation of OA as it is the knowledge divide between different countries and regions It is also crucial to address what needs to change in the research enterprise to make OS a worthwhile venture practice for most researchers and research role players and how they can cope with the contradictory challenges

The Digital Closet Alexander Monea, 2023-05-02 An exploration of how heteronormative bias is deeply embedded in the internet hidden in algorithms keywords content moderation and more In The Digital Closet Alexander Monea argues provocatively that the internet became straight by suppressing everything that is not forcing LGBTQIA content into increasingly narrow channels rendering it invisible through opaque algorithms automated and human content moderation warped keywords and other strategies of digital overreach Monea explains how the United States thirty year war on porn has brought about the over regulation of sexual content which in turn has resulted in the censorship of much nonpornographic content including material on sex education and LGBTQIA activism In this wide ranging enlightening account Monea examines the cultural technological and political conditions that put LGBTQIA content into the closet Monea looks at the anti porn activism of the alt right Christian conservatives and anti porn feminists who became strange bedfellows in the politics of pornography investigates the coders code and moderators whose work serves to reify heteronormativity and explores the collateral damage in the ongoing war on porn the censorship of LGBTQ community resources sex education materials art literature and other content that engages with sexuality but would rarely be categorized as pornography by today s community standards Finally he examines the internet architectures responsible for the heteronormalization of porn Google Safe Search and the data structures of tube sites and other porn platforms Monea reveals the porn industry s deepest darkest secret porn is boring Mainstream porn is stuck in a heteronormative filter bubble limited to the same heteronormative tropes tagged by the same heteronormative keywords This heteronormativity is mirrored by the algorithms meant to filter pornographic content increasingly filtering out all LGBTQIA content Everyone suffers from this forced heteronormativity of the internet suffering Monea suggests that could be alleviated by queering straightness and introducing feminism to dissipate the misogyny
