and adopted solution in the field of medical engineering and life sciences **From Social Harm to Zemiology** Victoria Canning, Steve Tombs, 2021-03-30 This book outlines key developments in understanding social harm by setting out its historical foundations and the discussions which have proliferated since It examines various attempts to conceptualise social harm and highlights key sites of contestation in its relationship to criminology to argue that these act as the basis for an activist zemiology one directed towards social change for social justice The past two decades have seen a proliferation of debate related to social harm in and around criminology From climate catastrophe and a focus on environmental harms unprecedented deaths generating focus on border harms and the coronavirus pandemic revealing the horror of mass and arguably avoidable deaths across the globe critical studies in social harm appear ever more pressing Drawing on a range of international case studies of cultural emotional physical and economic harms From Social Harm to Zemiology locates the study of social harm in an accessible fashion In doing so it sets out how a zemiological lens can moves us beyond many of the problematic legacies of criminology This book rejects criminologies which have disproportionately served to regulate intersectional groups and which have arguably inflicted as much or more harm by bolstering the very ideologies of control in offering minor reforms that inadvertently expand and strengthen states and corporations It does this by sketching out the contours objects methods and ontologies of a disciplinary framework which rejects commonplace assumptions of value freedom From Social Harm to Zemiology advocates social change in accordance with groups who are most disenfranchised and thus often most socially harmed An accessible and compelling read this book is essential reading for all zemiologists critical criminologists and those engaged with criminological and social theory Microbiomes of the Built Environment National Academies of Sciences, Engineering, and Medicine, National Academy of Engineering, Division on Engineering and Physical Sciences, Health and Medicine Division, Division on Earth and Life Studies, Board on Infrastructure and the Constructed Environment, Board on Environmental Studies and Toxicology, Board on Life Sciences, Committee on Microbiomes of the Built Environment: From Research to Application, 2017-11-06 People s desire to understand the environments in which they live is a natural one People spend most of their time in spaces and structures designed built and managed by humans and it is estimated that people in developed countries now spend 90 percent of their lives indoors As people move from homes to workplaces traveling in cars and on transit systems microorganisms are continually with and around them The human associated microbes that are shed along with the human behaviors that affect their transport and removal make significant contributions to the diversity of the indoor microbiome The characteristics of healthy indoor environments cannot yet be defined nor do microbial clinical and building researchers yet understand how to modify features of indoor environments such as building ventilation systems and the chemistry of building materials in ways that would have predictable impacts on microbial communities to promote health and prevent disease The factors that affect the environments within buildings the ways in which building characteristics influence the composition and function of indoor

microbial communities and the ways in which these microbial communities relate to human health and well being are extraordinarily complex and can be explored only as a dynamic interconnected ecosystem by engaging the fields of microbial biology and ecology chemistry building science and human physiology This report reviews what is known about the intersection of these disciplines and how new tools may facilitate advances in understanding the ecosystem of built environments indoor microbiomes and effects on human health and well being It offers a research agenda to generate the information needed so that stakeholders with an interest in understanding the impacts of built environments will be able to make more informed decisions

The New Age in the Modern West Nicholas Campion, 2015-11-19 New Age culture is generally regarded as a modern manifestation of Western millenarianism a concept built around the expectation of an imminent historical crisis followed by the inauguration of a golden age which occupies a key place in the history of Western ideas The New Age in the Modern West argues that New Age culture is part of a family of ideas including utopianism which construct alternative futures and drive revolutionary change Nicholas Campion traces New Age ideas back to ancient cosmology and questions the concepts of the Enlightenment and the theory of progress He considers the contributions of the key figures of the 18th century the legacy of the astronomer Isaac Newton and the Swedish visionary Emanuel Swedenborg as well as the theosophist H P Blavatsky the psychologist C G Jung and the writer and artist Jose Arguelles He also pays particular attention to the beat writers of the 1950s the counterculture of the 1960s concepts of the Aquarian Age and prophecies of the end of the Maya Calendar in 2012 Lastly he examines neoconservatism as both a reaction against the 1960s and as a utopian phenomenon The New Age in the Modern West is an important book for anyone interested in countercultural and revolutionary ideas in the modern West
