

Desktop

The desktop of OS X is part of a user interface called “Finder”. The Finder also allows the user to view their documents, applications, and system files found within volume folders and the user’s Home folder on the hard disk.

- **Finder Menu:** The Finder Menu allows for the organization of the desktop, and the ability to perform file management functions such as copy/paste and create a new folder.
- **Wireless Network:** The wireless network icon indicates whether the computer is currently connected to a wireless network, and at what strength the computer is receiving a wireless signal.
- **Spotlight:** Spotlight is a search engine built-in to OS X. This feature is helpful for finding misplaced files.
- **Hard Disk:** The hard disk is divided into a volumes section (the main disk and other drives) and a user specific Home folder.

Guide to Mac OS X Sierra (Version 10.12) Scott La Counte, 2016-09-20 Every year or so you hear the big pitch Windows is finally going to be awesome again. The new update is big, grander, and a huge overhaul. And then it comes, and it's more buggy, weirder, and less functional than the version that came before. That's probably what made you consider making the switch: you're tired of the excuses, and you want a computer that just works. Whether you are a new convert to Mac, still thinking about making the switch, or just want to learn more about Macs, this book will guide you through the Mac OS and help you see how making the switch really isn't the great leap that you once thought it was. This book will show you the basics and show you how to do the common day tasks you know on Windows, like right clicking. It will also show you how to get your Mac in sync with your iPad or iPhone and how to do everyday tasks like change background, find files, and performance tweaks to keep your Mac running like new. This book is based off of OS Sierra released September 20, 2016. Mac OS X Tiger Pocket Guide Chuck Toporek, 2005-06-03 There's a new cat in town, and Mac OS X Tiger is the next big thing from Apple. The latest version of Mac OS X Tiger is faster than its predecessors and packs a host of new features including Spotlight Dashboard, a totally new Mail application, Automator for making complex tasks simple, and many more. The Mac OS X Tiger Pocket Guide introduces you to the fundamental concepts of using Mac OS X Tiger. The book starts out with a quick run-down of Tiger's cool new features, including the new RSS screen saver and the built-in dictionary thesaurus you can use from any application. The Mac OS X Tiger Pocket Guide shows you how to use the Finder, the Dock, Expos, Spotlight Dashboard, including tips, tricks, and keyboard shortcuts along the way. You'll learn how to configure your Tiger system using the System Preferences application and also how to keep your Mac secure with things like FileVault, the Password Assistant, and Tiger's enhanced Firewall capabilities. And because Mac OS X Tiger is Unix-based, you'll also learn how to issue basic Unix commands using the Terminal application. This handy book has over 250 tips and tricks for using and configuring your Mac OS X system and has been completely revised to cover Mac OS X Tiger. Chuck Toporek has been using Macs since 1988 and is the author of *Inside Mac*.
