Christa A. Banister, author of *Around the World in 80 Dates* and *Blessed are the Meddlers*. **A Sensory History Manifesto** Mark M.

Smith, 2021-05-10 *A Sensory History Manifesto* is a brief and timely meditation on the state of the field. It invites historians who are unfamiliar with sensory history to adopt some of its insights and practices and it urges current practitioners to think in new ways about writing histories of the senses. Starting from the premise that the sensorium is a historical formation, Mark M. Smith traces the origins of historical work on the senses long before the emergence of the field now called sensory history, interrogating, exploring, and in some cases recovering pioneering work on the topic. Smith argues that we are at an important moment in the writing of the history of the senses and he explains the potential that this field holds for the study of history generally. In addition to highlighting the strengths of current work in sensory history, Smith also identifies some of its shortcomings. If sensory history provides historians of all persuasions with a useful and incisive way to write about the past, it also challenges current practitioners to think more carefully about the historicity of the senses and the desirability even the urgency of engaged and sustained debate among themselves. In this way, *A Sensory History Manifesto* invites scholars to think about how their field needs to evolve if the real interpretive dividends of sensory history are to be realized. Concise and convincing, *A Sensory History Manifesto* is a must read for historians of all specializations. *Popular Science*, 1951-11 *Popular Science* gives our readers the information and tools to improve their technology and their world. The core belief that *Popular Science* and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. You've seen the pictures. You know what happened. Or do you? On January 28, 1986, NASA's space shuttle Challenger exploded after blasting off from Cape Canaveral. Christa McAuliffe, America's Teacher in Space, was instantly killed along with the other six members of the mission. At least that's what most of us remember. Kevin Cook tells us what really happened on that ill-fated unforgettable day. He traces the pressures leading from NASA to the White House that triggered the fatal order to launch on an ice-cold Florida morning. Cook takes readers inside the shuttle for the agonizing minutes after the explosion.
