Technology, Mythology and the Search for Meaning Douglas

Francis,2023-11-15 This book offers a big picture look at the evolution of Western thought on technology by focusing on seven periods when there was a paradigm shift in perspective A techno myth is used to identify shape and capture the beliefs of each era Drawing from philosophy literature social sciences physical sciences mythology and cultural history the book brings to life the ideas of the great thinkers and the ancient myths What their message tells us is that we have failed to learn from the mistakes of the past We have allowed technology to take control of our lives and narrowed our thinking to a one dimensional materialistic perspective We have become prisoners in Max Weber s metaphoric iron cage But they also tell us how to free ourselves by humanizing technology so that humans are in control which is explored in depth in this book

Evolutions Oren Harman,2018-06-12 An absolute joy to read it is Harman s skill in blending contemporary science and traditional storytelling that makes this book truly brilliant Randy Rosenthal New York Journal of Books We no longer think like the ancient Chinese did that the world was hatched from an egg or like the Maori that it came from the tearing apart of a love embrace The Greeks told of a tempestuous Hera and a cunning Zeus but we now use genes and natural selection to explain fear and desire and physics to demystify the workings of the universe Science is an astounding achievement but are we really any wiser than the ancients Has science revealed the secrets of fate and immortality Has it provided protection from jealousy or love There are those who believe that science has replaced faith but must it also be a death knell for mythology *Evolutions* brings to life the latest scientific thinking on the birth of the universe and the solar system the journey from a single cell all the way to our human minds Reawakening our sense of wonder Oren Harman uses modern science to create new and original mythologies Here are the earth and the moon presenting a cosmological view of motherhood a panicking mitochondrion introducing sex and death to the world Science may not solve our existential puzzles but like the age old legends its magical discoveries can help us continue the never ending search Breathtaking The processes of evolution are at times so huge and ungraspable for the mind so magical that they can perhaps only be fathomed through the language of myth Brilliant Karin Altenberg Wall Street Journal Harman is a marvelous intellectual companion David B Green Haaretz
