**Logical Methods** John N. Crossley, Jeffrey B. Remmel, Richard Shore, Moss E. Sweedler, 1994-01-26 The twenty six papers in this volume reflect the wide and still expanding range of Anil Nerode's work A conference on Logical Methods was held in honor of Nerode's sixtieth birthday 4 June 1992 at the Mathematical Sciences Institute Cornell University 13 June 1992 Some of the conference papers are here but others are from students co workers and other colleagues The intention of the conference was to look forward and to see the directions currently being pursued in the development of work by or with Nerode Here is a brief summary of the contents of this book We give a retrospective view of Nerode's work A number of specific areas are readily discerned recursive equivalence types recursive algebra and model theory the theory of Turing degrees and recursive sets polynomial time computability and computer science Nerode began with automata theory and has also taken a keen interest in the history of mathematics All these areas are represented The one area missing is Nerode's applied mathematical work relating to the environment Kozen's paper builds on Nerode's early work on automata Recursive equivalence types are covered by Dekker and Barback the latter using directly a fundamental metatheorem of Nerode Recursive algebra is treated by George Richards group representations Recursive model theory is the subject of papers by Hird Moses and Khoussainov Dadajonov while a combinatorial problem in recursive model theory is discussed in Cherlin Martin's paper Cenzer presents a paper on recursive dynamics The Best Books: D, Society, E, Geography, 1912 William Swan Sonnenschein, 1912

**Reimagining School Integration** Jennifer B. Ayscue, 2024-08-01 Since the peak of school desegregation in the late 1980s schools across the nation have been resegregating such that schools are now as segregated as they were during the late 1960s Segregation is systematically linked to unequal educational opportunities and outcomes while integration when well structured is associated with numerous short term and long term academic and social benefits for individuals and society In a time when public education is under attack and our nation is deeply divided along the lines of race class and politics the potential of integration to create more equitable educational opportunities and outcomes for individual students as well as greater social cohesion for our democratic pluralistic society is more important than ever Seventy years after the Supreme Court's landmark *Brown v Board of Education* decision ruled that segregated schools are inherently unequal this book reimagines what integration is and could be in our nation's current context of racial and political polarization the expansion of unregulated choice in public education and an increasingly diverse multiracial public school enrollment Through an exploration of research and policy this book develops a new conceptualization of integration by describing the contemporary drivers of segregation and recommending strategies to create a more equitable meaningful equal status form of educational integration for the future This book is a valuable resource for policymakers scholars

educators and concerned citizens who are invested in learning about one way to help create a more equitable and just education system

**Developments in the Methodology of Social Science** W. Leinfellner, Eckehart Köhler, 2012-12-06

Philosophy of Science deals with the problem What is science It seems that the answer to this question can only be found if we have an answer to the question How does science function Thus the study of the methodology of social sciences is a prominent factor in any analysis of these sciences The history of philosophy shows clearly that the answer to the question How does science function was the *conditio sine qua non* of any kind of philosophy of science epistemology and even of logic Aristotle Hume Kant Mill Russell to mention a few classical authors clearly emphasized the primacy of methodology of science for any kind of philosophy of science One may even state that analyses of the presuppositions the foundations the aims goals and purposes of science are nothing else than analyses of their general and specific formal as well as practical and empirical methods Thus the whole program of any philosophy of science is dependent on the analysis of the methods of sciences and the establishment of their criteria If the study of scientific method is the predominant factor in the philosophy of science then all the other problems will depend on the outcome of such a study For example the old question of a possible unity of all social sciences will be brought to a solution by the study of the presuppositions the methods as well as of the criteria germane to all social sciences

**The SAGE Encyclopedia of Social Science Research Methods** Michael Lewis-Beck, Alan E Bryman, Tim Futing Liao, 2004 This defining work will be valuable to readers and researchers in social sciences and humanities at all academic levels As a teaching resource it will be useful to instructors and students alike and will become a standard reference source Essential for general and academic collections CHOICE Appreciative users of this volume will be students faculty and researchers in academic special and large public libraries for whom it is recommended LIBRARY JOURNALS SAGE Reference is proud to announce The SAGE Encyclopedia of Social Science Research Methods a three volume resource that is a first of its kind developed by the leading publisher of social science research methods books and journals This unique multi volume reference set offers readers an all encompassing education in the ways of social science researchers Written to be accessible to general readers entries do not require any advanced knowledge or experience to understand the purposes and basic principles of any of the methods The Encyclopedia features two major types of entries definitions consisting of a paragraph or two provide a quick explanation of a methodological term and topical treatments or essays discussing the nature history application example and implication of using a certain method Also included are suggested readings and references for future study To help provide a more complete explanation than is often achieved within the scope of a single article key terms and concepts appear in SMALL CAPITAL LETTERS to refer readers to related terms explained elsewhere In addition to epistemological issues that influence the nature of research questions and assumptions The SAGE Encyclopedia of Social Science Research Methods tackles topics not normally viewed as part of social science research methodology from philosophical issues such as poststructuralism to advanced statistical techniques In

covering the full range of qualitative and quantitative data analyses this key reference offers an integrated approach that allows the reader to choose the most appropriate and robust techniques to apply to each situation Many entries treat traditional topics in a novel way stimulating both interest and new perspectives One example is the entry Econometrics by Professor Damodar Gujarati Following a process which many educators preach but seldom practice Gujarati walks the reader twice through the research process from economic theory to data and models to analysis once in principle and a second time with an example In using the ordinary process of economic research to achieve an extraordinary impact he leaves the reader thinking not only about methods and models but also the fundamental purpose of econometrics Topics Covered Analysis of Variance Association and Correlation Basic Qualitative Research Basic Statistics Causal Modeling Structural Equations Discourse Conversation Analysis Econometrics Epistemology Ethnography Evaluation Event History Analysis Experimental Design Factor Analysis Related Techniques Feminist Methodology Generalized Linear Models Historical Comparative Interviewing in Qualitative Research Latent Variable Model Life History Biography Loglinear Models Categorical Dependent Variables Longitudinal Analysis Mathematics and Formal Models Measurement Level Measurement Testing Classification Multiple Regression Multilevel Analysis Qualitative Data Analysis Sampling in Surveys Sampling in Qualitative Research Scaling Significance Testing Simple Regression Survey Design Time Series Key Features Over 900 entries arranged A to Z Each entry is written by a leading authority in the field covering both quantitative and qualitative methods Covers all disciplines within the social sciences Contains both concise definitions and in depth essays Three volumes and more than 1500 pages
