with the international regulation of non state armed groups Specifically it examines the possibility of subjecting armed groups to international human rights law obligations First addressed is the means by which armed groups may be bound by international law Of particular interest is the de facto control theory and the possibility that international law may be applied in the absence of direct treaty regulation Application of this theory is dependent upon an armed group s establishment of an independent existence as demonstrated by the displacement of state authority This means that armed groups are treated as a

vertical authority thereby maintaining the established hierarchy of international regulation. At issue therefore is not a radical approach to the regulation of non state actors but rather a modification of the traditional means of application in response to the reality of the situation. The attribution of international human rights law obligations to armed groups is then addressed in light of potential *ratione personae* restrictions. International human rights law treaties are interpreted in light of the contemporary international context on the basis that an international instrument has to be applied within the framework of the entire legal system prevailing at the time of interpretation. Armed groups status as vertical authorities facilitates the vertical application of international human rights law in a manner consistent with both the object and purpose of the law and its foundation in human dignity. Finally if international human rights law is to be applied to armed groups its application must be effective in practice. A context dependent division of responsibility between the territorial state and the armed group is proposed. The respect protect fulfil framework is adapted to facilitate the application of human rights obligations in a manner consistent with the control exerted by both the state and the armed group. Daragh Murray's book analyses the practical and theoretical difficulties associated with the topic of the international human rights obligations of non state armed groups by considering the latest developments in this field and suggesting ways forward. His proposals are realistic and carefully argued. This book should be essential reading for anyone grappling with this subject. Andrew Clapham, Professor of

International Law at the Graduate Institute of International and Development Studies **Once and Future Partners**
 William C. Potter, Sarah Bidgood, 2018-10-09 Despite their Cold War rivalry the United States and the Soviet Union frequently engaged in joint efforts to prevent the spread of nuclear weapons. Leaders in Washington and Moscow recognized that nuclear proliferation would serve neither country's interests even when they did not see eye to eye in many other areas. They likewise understood why collaboration in mitigating this nuclear danger would serve both their own interests and those of the international community. This volume examines seven little known examples of US Soviet cooperation for non proliferation including preventing South Africa from conducting a nuclear test, developing international safeguards and export control guidelines and negotiating a draft convention banning radiological weapons. It uses declassified and recently digitized archival material to explore in depth the motivations for and modalities for cooperation under often adverse political circumstances. Given the current disintegration of Russian and US relations including in the nuclear sphere this history is especially worthy of review. Accordingly the volume's final chapter is devoted to discussing how non proliferation lessons from the past can be applied today in areas most in need of US Russian cooperation Long-term Management and Storage of Elemental Mercury, 2011 **The Athenaeum**, 1866 **The Legal Integration of Energy Markets** Terence Daintith, Stephen F. Euro Area Policies International Monetary Fund. European Dept., 2017-07-25 This paper focuses on the convergence performance of euro area countries before and after euro introduction The analysis compares per capita incomes across countries both for the initial group of twelve countries that adopted the euro before 2002 the so called EA 12 as well as the current group of 19 euro area members EA 19 The convergence process has stalled since the introduction of the euro except for new euro area members which reduced their income gaps vis vis the founding members until their adoption of the common currency The convergence of income levels is not a prerequisite for a functioning monetary union but has been considered an important objective of the European economic integration process Lagging productivity growth in countries with lower initial GDP per capita is found to be the main explanation for the lack of convergence suggesting that structural reforms can help to restart the convergence process
