from other industries to improve the efficiency and safety of winter highway maintenance vehicle operations and to provide
travelers with the level of service defined by policy during the winter season at the least cost to the taxpayers The results of
the first phase of the research were documented in the Concept Highway Maintenance Vehicle Final Report Phase One dated
April 1997 which describes the desirable functions of a concept maintenance vehicle and evaluates its feasibility Phase I
concluded by establishing the technologies that would be assembled and tested on the prototype vehicles in Phase II The
primary goals of phase II were to install the selected technologies on the prototype winter maintenance vehicles and to
conduct proof of concept in advance of field evaluations planned for Phase III This Phase III final report documents the work
completed since the end of Phase II During this time period the Phase III work plan was completed and the redesigned
friction meter was field tested A vendor meeting was held to discuss future private sector participation and the new design
for the Iowa vehicle In addition weather and roadway condition data were collected from the roadway weather information
systems at selected sites in Iowa and Minnesota for comparison to the vehicles onboard temperature sensors Furthermore
